12 AKKO SCISSORS WARRANTY **78**

Dear Colleagues,
After 35 years of experience in the grooming industry, first as a groomer, participating in national and international competitions, then as an All-Round judge and event organiser, I have found my most authentic aspiration.

My greatest desire is to share my experience with all of you, dedicating myself to the teaching and the training of young Groomers, as well as those who are already experienced, for the professional growth of us all.

After meeting many of you at the events I've organised, I came to the realisation that we all deserve to have at our disposal tools that are able to meet the many diverse needs of each individual. In order to achieve maximum comfort and the best results in our work, I have spent several years designing these tools, which have now been on the market for more than five years. Your favourable feedback and suggestions have in the meantime led to the further development of this product line, now enriched with new and technologically state-of-the-art tools. Today, I am pleased to announce that the new Akko Scissors product line is available, complete with its full range of products.

Keep up the good work!

Paola Acco

01 SCISSORS

AKKO GROOMING SCISSORS are increasingly recognized as the preferred choice among groomers and training programs in the pet grooming industry. Their superior quality, exceptional cutting precision, and long-lasting durability have earned them an outstanding reputation among grooming professionals.

MAIN FEATURES OF AKKO SCISSORS

BALL BEARING SCREW

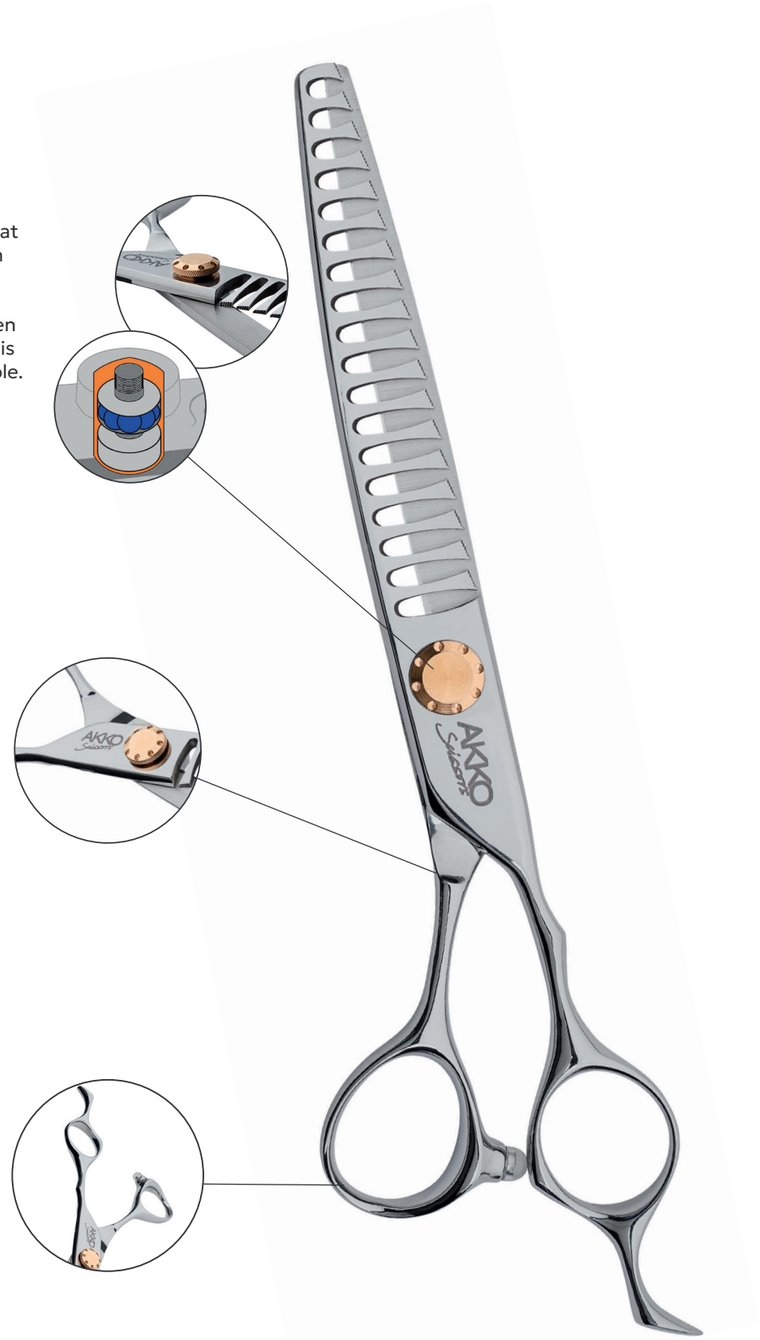
It consists of a circular ring system that accommodates stabilised spheres: an innovative ball bearing system that is able to withstand years of continual professional use. The advantages given by the stability and smoothness of this mechanism are immediately noticeable.

TEFLON RIDE

The double TEFLON RIDE substantially reduces friction between the blades, allowing effortless cuts for the groomer and significantly reducing hand stress and fatigue. The reduced friction between the blades prevents metal wear, prolonging the scissors' lifetime. While Teflon is a very durable material, it can wear out over time, as it is placed right in the middle of the circular ride. However, it can be replaced by Akko Scissors' trusted partner technicians if need be. Replacing worn Teflon rides will extend the life of the instrument, making the scissors "as good as new". Without the Teflon ride, the scissors would have to be thrown away once the metal has worn out.

ADVANCED HANDLES

Our tools help to reduce hand and wrist fatigue during grooming sessions, which are often characterised by repetitive movements. This reduces the risk of developing tendinitis or other repetitive strain syndromes.



01.1 STRAIGHT SCISSORS

Straight scissors are the oldest design, suitable mainly for dogs'straight body areas (such as backline, legs, etc.). They have different blade widths, the three best-known being:

WIDE BLADES:

These are slightly heavier blades, due to the greater amount of material they are made of but they provide a safer and more decisive cut. To ensure the best use of wide-blade scissors, it is recommended to have a good hand grip. This is because their weight can cause the tips to move, compromising the work. Wider blades offer a greater variety of cuts, from thinning to quick refinishing and trims (*e.g. Believe or Be Sure by Akko Scissors*).

INTERMEDIATE BLADES:

Are lighter in weight and easier to handle due to their smaller size. They can provide a cut similar to that of narrower blades while maintaining the quality of wider blades. They are almost as light as narrower ones (*e.g. Hammer by Akko Scissors*)

NARROW BLADES:

This type of blade is lighter, allowing for more control over the tool, which makes them highly recommended for beginners. They are well suited for working on smaller body parts (e.g. muzzles) or for creating Asian Style grooming cuts. They are very easy to handle (*e.g. Asian Straight by Akko Scissors*).

BELIEVE

SKU: F1101 **SIZE:** 8”
SKU: F1102 **SIZE:** 8,5”

TYPE OF SCISSORS: Straight
MATERIAL: Japanese Steel SUS440C
BLADE TYPE: Convex – Wide Blade
CUTTING RATIO: 100%
SCREW: Ball Bearing
HARDNESS: 60-61 HRC
AVAILABLE SIZES: 8” - 8,5”
HANDLES: Offset
TEFLON RIDE: Double Teflon Ride

RECOMMENDED LEVEL: Intermediate, Expert
RECOMMENDED USE: Powerful scissors capable of cutting any coat length and texture. Ideal for creating lines and quickly roughing down curly, smooth, or double coats. Also excellent for finishing. Great for precision work. The offset handles offer maximum comfort and allow the scissors to be used for long periods of time. Believe, scissors for true connoisseurs.

BE SURE

SKU: F1201 **SIZE:** 7,5”
SKU: F1202 **SIZE:** 8”
SKU: F1203 **SIZE:** 8,5”

TYPE OF SCISSORS: Straight
MATERIAL: Japanese Steel SUS440C
BLADE TYPE: Convex – Wide Blade
CUTTING RATIO: 100%
SCREW: Ball Bearing
HARDNESS: 60-61 HRC
AVAILABLE SIZES: 7,5” - 8” - 8,5”
HANDLES: Offset
TEFLON RIDE: Double Teflon Ride

RECOMMENDED LEVEL: Intermediate, Expert
RECOMMENDED USE: Excellent scissors for finishing and smoothing all coat textures. Excellent for precision cuts. They stand out for their exceptional maneuverability and ergonomic handle, which allows the wrist to rest, thus maintaining optimal posture. They allow for a clean finish on any properly prepared coat. A must-have model.

HAMMER

SKU: F1301 **SIZE:** 7,5”
SKU: F1302 **SIZE:** 8”
SKU: F1303 **SIZE:** 8,5”

TYPE OF SCISSORS: Straight
MATERIAL: Japanese Steel SUS440C
BLADE TYPE: Convex – Intermediate Blade
CUTTING RATIO: 100%
SCREW: Ball Bearing
HARDNESS: 60-61 HRC
AVAILABLE SIZES: 7,5” - 8” - 8,5”
HANDLES: Semi-Offset
TEFLON RIDE: Double Teflon Ride

RECOMMENDED LEVEL: Intermediate, Expert
RECOMMENDED USE: Very light scissors, thanks to the mirror-finished “sword” blade. They are excellent for thick, curly coats, as well as for thinning or smooth coats, creating perfect lines. The semi-convex edges promote a smooth cut. Excellent for everyday commercial work. “Just the right amount of sharpness”!

BONUS

SKU: F1401 **SIZE:** 7,5”
SKU: F1402 **SIZE:** 8”

TYPE OF SCISSORS: Straight
MATERIAL: Cobalt Steel
BLADE TYPE: Convex – Intermediate Blade
CUTTING RATIO: 100%
SCREW: Ball Bearing
HARDNESS: 58-59 HRC
AVAILABLE SIZES: 7,5” - 8”
HANDLES: Symmetrical
TEFLON RIDE: Double Teflon Ride

RECOMMENDED LEVEL: Beginner, Intermediate, Expert.
RECOMMENDED USE: Scissors with symmetrical handles, allowing cuts on large amounts of coat where good blade opening is required. Scissors suitable for daily commercial use in grooming, can be used on all coat types. Excellent value for money for sturdy and durable scissors.

WONDER STRAIGHT NEW

SKU: F1701 **SIZE:** 8”

TYPE OF SCISSORS: Straight
MATERIAL: Japanese Steel SUS440C
BLADE TYPE: Convex – with micro-serrations
CUTTING RATIO: 100%
TEETH: /
SCREW: Ball Bearing
HARDNESS: 60-61 HRC
AVAILABLE SIZES: 8”
HANDLES: Offset
TEFLON RIDE: None

RECOMMENDED LEVEL: Beginner, Intermediate, Expert
RECOMMENDED USE: Straight Scissors deliver precise finishing, smoothing, and rough cutting on all coat types. The new-generation micro-toothed blade ensures secure hair grip and controlled, uniform cuts. Asymmetrical handles reduce fatigue and support fluid movement, while the Ball Bearing tensioner offers smooth handling. The medium sword blade and semi-convex edge guarantee durability, sharpness, and professional performance in any grooming setting.

ASIAN GAME STRAIGHT

SKU: F1501 **SIZE:** 6,5”

TYPE OF SCISSORS: Straight
MATERIAL: Cobalt Steel
BLADE TYPE: Convex – Narrow Blade
CUTTING RATIO: 100%
SCREW: Ball Bearing
HARDNESS: 58-59 HRC
AVAILABLE SIZES: 6,5”
HANDLES: Symmetrical - Reversible
TEFLON RIDE: Double Teflon Ride

RECOMMENDED LEVEL: Beginner, Intermediate, Expert
RECOMMENDED USE: Small, lightweight scissors. The symmetrical handles with a classic design make these scissors reversible, so they can be used on both sides. With a length of 6.5”, they are designed for finishing small details, such as feet and muzzles, and for creative Asian-style cuts. Scissors with a classic center of gravity, with the weight evenly distributed between the blades and handles. They make work easier!!!

LIBERTY STRAIGHT

SKU: F1601 **SIZE:** 8”

TYPE OF SCISSORS: Straight
MATERIAL: Cobalt Steel
BLADE TYPE: Convex - Narrow Blade
CUTTING RATIO: 100%
SCREW: Ball Bearing
HARDNESS: 57-58 HRC
AVAILABLE SIZES: 8”
HANDLES: Offset
TEFLON RIDE: None

RECOMMENDED LEVEL: Beginner
RECOMMENDED USE: Very strong scissors, yet surprisingly comfortable and well balanced, although cheaper than other scissors in the Akko Scissors range, which are technically and qualitatively superior. Excellent for all everyday commercial work and suitable for the first stage of roughing out curly coats and the thickest and most difficult coats of mixed breeds. These scissors cut well and allow you to achieve a first finish at the same time.

ACADEMY STRAIGHT

SKU: F9101 **SIZE:** 7,5”

TYPE OF SCISSORS: Straight
MATERIAL: Cobalt Steel
BLADE TYPE: Convex – Intermediate Blade
CUTTING RATIO: 100%
SCREW: Ball Bearing
HARDNESS: 57-58 HRC
AVAILABLE SIZES: 7,5”
HANDLES: Semi Offset
TEFLON RIDE: None

RECOMMENDED LEVEL: Beginner
RECOMMENDED USE: Straight scissors for all purposes, designed for novice groomers. They thin and pre-finish the most thick and difficult coats. Ideal for Poodles, Bichon Frisés, and mixed breeds. Excellent value for money.

01.2 CURVED SCISSORS

DEGREE OF CURVATURE:

there are different degrees of curvature of the blades, but the most common on the market are blades with a curvature of 15° (*e.g. Magic Ball 15° by Akko Scissors*) or 30° (*e.g. Asian Game 30° by Akko Scissors or Boombastik by Akko Scissors*): those with a 15° curvature are used for larger areas (e.g. legs, rib-cage), while the 30° blades, being much more curved, are more suitable for
decidedly more rounded areas (e.g. Asian-style muzzles and heads).
The latest concept in terms of curvature consists of blades with a 40° curvature (*e.g. Asian Moon 40° by Akko Scissors*) or even a 45° curvature (*e.g. Asian Max 45° by Akko Scissors*), which allow you to quickly create any rounded shape, even the most extreme, with just a few snips, for example on small heads, moustaches and beards, details of feet and folds of flank, even on small dogs, reducing working times.

MAGIC BALL 15°

SKU: F2401 **SIZE:** 7,5”
SKU: F2402 **SIZE:** 8”

TYPE OF SCISSORS: Curved
MATERIAL: Japanese Steel SUS440C
BLADE TYPE: Convex – Intermediate Blade
CUTTING RATIO: 100%
SCREW: Ball Bearing
CURVATURE: 15°
HARDNESS: 60-61 HRC
AVAILABLE SIZES: 7,5” - 8”
HANDLES: Symmetrical - Reversible
TEFLON RIDE: None

RECOMMENDED LEVEL: Intermediate, Expert
RECOMMENDED USE: Scissors with a 15° curved blade, allowing quick, precise cuts on curved surfaces of the trunk and limbs. The medium-width blade makes Magic Ball scissors lightweight and extremely easy to handle for groomers, allowing for great agility of use. They are particularly suitable for creating roundness on large areas such as the rib-cage, buttocks, hocks, and heads of large dogs. These scissors are sturdy and capable of handling large amounts of coat while ensuring a very clean finish.

ACADEMY CURVED 25°

SKU: F9201 **SIZE:** 7,5”

TYPE OF SCISSORS: Curved
MATERIAL: Cobalt Steel
BLADE TYPE: Convex – Intermediate Blade
CUTTING RATIO: 100%
CURVATURE: 25°
SCREW: Ball Bearing
HARDNESS: 57-58 HRC
AVAILABLE SIZES: 7,5”
HANDLES: Symmetrical - Reversible
TEFLON RIDE: None

RECOMMENDED LEVEL: Beginner
RECOMMENDED USE: Multipurpose Curved scissors, suitable for new groomers. The curvature allows for great versatility, making these scissors suitable for Asian style cuts, for heads, angles, and roundness in general. Excellent value for money.

ASIAN GAME 30°

SKU: F2101 **SIZE:** 6,5”
SKU: F2102 **SIZE:** 7,5”
SKU: F2103 **SIZE:** 8”
SKU: F2104 **SIZE:** 8,5”

TYPE OF SCISSORS: Curved
MATERIAL: Cobalt Steel
BLADE TYPE: Convex – Narrow Blade
CUTTING RATIO: 100%
SCREW: Ball Bearing
CURVATURE: 30°
HARDNESS: 58-59 HRC
AVAILABLE SIZES: 6,5” - 7,5” - 8” - 8,5”
HANDLES: Symmetrical – Reversible
TEFLON RIDE: None

RECOMMENDED LEVEL: Beginner, Intermediate, Expert
RECOMMENDED USE: Professional Curved scissors for Asian Style cuts, suitable for both experts and beginners thanks to the narrow blade. Ideal curvature for rounding the muzzle, whiskers, angles, and feet. Reversible and practical scissors, essential for everyday commercial work.

BOOMBASTIK 30°

SKU: F2501 **SIZE:** 8”

TYPE OF SCISSORS: Curved
MATERIAL: Japanese Steel SUS440C
BLADE TYPE: Convex – Wide Blade
CUTTING RATIO: 100%
SCREW: Ball Bearing
CURVATURE: 30°
HARDNESS: 60-61 HRC
AVAILABLE SIZES: 8”
HANDLES: Symmetrical - Reversible
TEFLON RIDE: None

RECOMMENDED LEVEL: Expert
RECOMMENDED USE: Curved scissors with wide blades, ideal for easily creating large curves on all coat textures.
They allow for quick and precise cutting, ensuring excellent smoothing.
They also ensure uniform and clean cuts.

LIBERTY 30° CURVED

SKU: F2601 **SIZE:** 8”

TYPE OF SCISSORS: Curved
MATERIAL: Cobalt Steel
BLADE TYPE: Convex - Narrow Blade
CUTTING RATIO: 100%.
SCREW: Ball Bearing
CURVATURE: 30°
HARDNESS: 57-58 HRC
AVAILABLE SIZES: 8”
HANDLES: Semi Offset
TEFLON RIDE: None

RECOMMENDED LEVEL: Beginner
RECOMMENDED USE: Scissors designed specifically to work well on both small and large subjects in everyday commercial work. Thanks to their narrow blade, they are very light and easy to handle, although they are very sturdy and more economical than other scissors in the Akko Scissors line (which are technically and qualitatively superior). The blade is curved at 30°, an angle that allows you to quickly cut curved surfaces of all body curves: rib-cage, buttocks, hocks, and heads of dogs of all sizes.

ASIAN MOON 40°

SKU: F2201 **SIZE:** 7”

TYPE OF SCISSORS: Curved
MATERIAL: Japanese Steel SUS440C
BLADE TYPE: Convex – Narrow Blade
CUTTING RATIO: 100%
SCREW: Ball Bearing
CURVATURE: 40°
HARDNESS: 60-61 HRC
AVAILABLE SIZES: 7”
HANDLES: Symmetrical – Reversible
TEFLON RIDE: None

RECOMMENDED LEVEL: Beginner, Intermediate, Expert
RECOMMENDED USE: Ideal scissors for small and medium breeds, designed to create extreme curves on the head, legs and feet or to create angles on the trunk and limbs. Excellent for innovative cuts and Asian styles, as well as for finishing touches, especially to achieve accentuated roundness. Suitable for all coat textures.

ASIAN MAX 45°

SKU: F2301 **SIZE:** 7”

TYPE OF SCISSORS: Curved
MATERIAL: Japanese Steel SUS440C
BLADE TYPE: Convex – Narrow Blade
CUTTING RATIO: 100%
SCREW: Ball Bearing
CURVATURE: 45°
HARDNESS: 60-61 HRC
AVAILABLE SIZES: 7”
HANDLES: Symmetrical – Reversible
TEFLON RIDE: None

RECOMMENDED LEVEL: Beginner, Intermediate, Expert
RECOMMENDED USE: Scissors designed to achieve extreme curves on the head, feet and legs, suitable for small breeds. Excellent for creative and Asian-style cuts and for finishing, especially for creating very accentuated roundness on all coat textures.

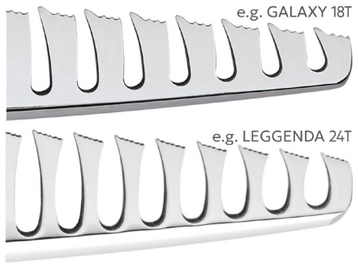
01.3 SUPER BLENDER SCISSORS

Super Blender scissors are composed of a plain blade and a toothed blade. They are characterized by a wide tooth, which has several grooves (slots) on its tip. Used to create lines on smooth coats and double coats.

SUPER BLENDERS for STRAIGHT COATS

1ST PHASE
ROUGHING QUANTITY

Blade with WIDE TOOTH WITH SLOTS



DOLOMITI 16T

SKU: F3701 **SIZE:** 7”

TYPE OF SCISSORS: Super Blenders
MATERIAL: Cobalt Steel
BLADE TYPE: Convex + Super Blenders
CUTTING RATIO: 60%
TEETH: 16
SCREW: Ball Bearing
HARDNESS: 58-59 HRC
AVAILABLE SIZES: 7”
HANDLES: Semi Offset
TEFLON RIDE: Double Teflon Ride

RECOMMENDED LEVEL: Intermediate, Expert
RECOMMENDED USE: Scissors that stand out for their ability to guarantee precise cuts and well-defined lines with just a few movements, especially on very dense textures. They are suitable for all breeds with double coats, but are equally effective on smooth, straight, silky, shaggy coats or on featherings. These scissors are extremely sturdy, yet lightweight and well balanced.

A REVOLUTION 27T - 33T

SKU: F3101 **SIZE:** 6,5”
SKU: F3102 **SIZE:** 7”

TYPE OF SCISSORS: Super Blenders
MATERIAL: Japanese Steel SUS440C
BLADE TYPE: Convex + Super Blenders
CUTTING RATIO: 65%
TEETH: 27 in the size: 6,5”
TEETH: 33 in the size: 7”
SCREW: Ball Bearing
HARDNESS: 60-61 HRC
AVAILABLE SIZES: 6,5” - 7”
HANDLES: Semi Offset
TEFLON RIDE: Double Teflon Ride

RECOMMENDED LEVEL: Intermediate, expert.
RECOMMENDED USE: Multifunctional scissors, characterized by wide, hammer-shaped teeth, which allow for quick cuts without leaving marks on the coat. They are particularly effective in finishing and smoothing curly coats, but are also perfectly suited to double coats, such as those of Spitz dogs, and can also be used on smooth coats to easily create the desired cut. They are therefore very versatile scissors, thanks to their special teeth, which allow different effects to be achieved on various coats.

A REVOLUTION 33T PLUS

SKU: F3201 **SIZE:** 7,5”

TYPE OF SCISSORS: Super Blenders
MATERIAL: Japanese Steel SUS440C
BLADE TYPE: Convex + Super Blenders
CUTTING RATIO: 70%
TEETH: 33
SCREW: Ball Bearing
HARDNESS: 60-61 HRC
AVAILABLE SIZES: 7,5”
HANDLES: Semi Offset
TEFLON RIDE: Double Teflon Ride

RECOMMENDED LEVEL: Intermediate, Expert
RECOMMENDED USE: Multifunctional scissors particularly effective in finishing and smoothing curly coats, but also suitable for double coats, such as those of Spitz dogs; they can also be used on smooth coats to easily create the line of the cut. The A Revolution 7.5“ Plus version has wider spaces between the teeth than the 6.5” and 7” A Revolution versions. These scissors are therefore perfect for thicker coats.

GRAFFITI 37T

SKU: F3401 **SIZE:** 7,5”

TYPE OF SCISSORS: Super Blenders
MATERIAL: Japanese Steel SUS440C
BLADE TYPE: Convex + Super Blenders
CUTTING RATIO: 70%
TEETH: 37
SCREW: Ball Bearing
HARDNESS: 60-61 HRC
AVAILABLE SIZES: 7,5”
HANDLES: Semi Offset
TEFLON RIDE: Double Teflon Ride

RECOMMENDED LEVEL: Intermediate, Expert
RECOMMENDED USE: Multifunction scissors with a special curved and offset tooth, which allows for very fast cutting and thinning, even with large amounts of coat. They provide an excellent finish on smooth, soft, and difficult-to-work coats. As they cut, they also finish curly or double coats, ensuring the best possible grip on the coat. An absolute guarantee of excellent results.

PANAMERA 18T

SKU: F3601 **SIZE:** 7”

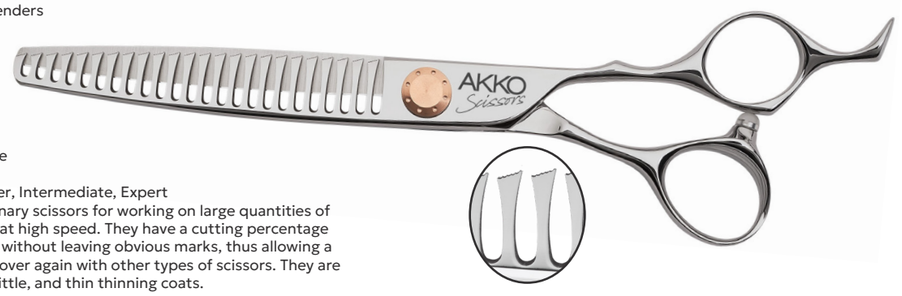
TYPE OF SCISSORS: Super Blenders
MATERIAL: Cobalt Steel
BLADE TYPE: Convex + Super Blenders
CUTTING RATIO: 70%
TEETH: 18
SCREW: Ball Bearing
HARDNESS: 58-59 HRC
AVAILABLE SIZES: 7”
HANDLES: Semi Offset
TEFLON RIDE: Double Teflon Ride

RECOMMENDED LEVEL: Beginner, Intermediate, Expert
RECOMMENDED USE: Wonderful scissors for working on abundant coats, even thick ones, defining lock by lock. Originally designed for straight, woolly or silky coats, they are also excellent on curly coats. The powerful teeth cut cleanly with little effort. For those who love speed and cutting power.

LEGGENDA 24T - 27T

SKU: F3301 **SIZE:** 7”
SKU: F3302 **SIZE:** 7,5”

TYPE OF SCISSORS: Super Blenders
MATERIAL: Japanese Steel SUS440C
BLADE TYPE: Convex + Super Blenders
CUTTING RATIO: 75%
TEETH: 24 in the size 7”
TEETH: 27 in the size 7,5”
SCREW: Ball Bearing
HARDNESS: 60-61 HRC
AVAILABLE SIZES: 7” - 7,5”
HANDLES: 60-61 HRC
TEFLON RIDE: Double Teflon Ride



RECOMMENDED LEVEL: Beginner, Intermediate, Expert
RECOMMENDED USE: Extraordinary scissors for working on large quantities of smooth, straight, and silky coats at high speed. They have a cutting percentage that allows you to create the line without leaving obvious marks, thus allowing a good finish without having to go over again with other types of scissors. They are also excellent for use on curly, brittle, and thin thinning coats.

GALAXY 18T

SKU: F3501 **SIZE:** 7,5”

TYPE OF SCISSORS: Super Blenders
MATERIAL: Japanese Steel SUS440C
BLADE TYPE: Convex + Super Blenders
CUTTING RATIO: 80%
TEETH: 18
SCREW: Ball Bearing
HARDNESS: 60-61 HRC
AVAILABLE SIZES: 7,5”
HANDLES: Semi Offset
TEFLON RIDE: Double Teflon Ride

RECOMMENDED LEVEL: Intermediate, Expert
RECOMMENDED USE: These latest design scissors are already among the most popular Super Blenders requested by professionals. Fantastic for working on large amounts of coat, even very thick textures. They are ideal for smooth coats, but also work well on woolly or double coats. Thanks to the powerful teeth and U-shaped slots, these scissors keep the coat stable during cutting, ensuring a clean, effortless cut. Cutting speed is guaranteed for creating the line.

FORCE ONE 18T

SKU: F3801 **SIZE:** 7”

TYPE OF SCISSORS: Super Blenders
MATERIAL: Japanese Steel SUS440C
BLADE TYPE: Convex + Super Blenders
CUTTING RATIO: 90%
TEETH: 18
SCREW: Ball Bearing
HARDNESS: 60-61 HRC
AVAILABLE SIZES: 7”
HANDLES: Symmetrical - Reversible
TEFLON RIDE: Double Teflon Ride

RECOMMENDED LEVEL: Expert
RECOMMENDED USE: Scissors that, thanks to their CNC laser sharpening, have a truly unique cutting ability! The 18 teeth on the blade are equipped with special “tiger tooth” slots that cut through large amounts of both thick and voluminous coats. The shape of the teeth is similar to that of Chunker scissors but with deep grooves at the tips to ensure a perfect grip on different textures, smooth, silky, and double coats. The symmetry of the handles has been specially designed to make the scissors reversible, so they can be used with the toothed blade positioned either at the top or at the bottom. These scissors are also excellent for working on coarse and rough coats.

MAXIMA 24T

SKU: F3901 **SIZE:** 7,5”

TYPE OF SCISSORS: Super Blenders
MATERIAL: Japanese Steel SUS440C
BLADE TYPE: Convex + Super Blenders
CUTTING RATIO: 90%
TEETH: 24
SCREW: Ball Bearing
HARDNESS: 60-61 HRC
AVAILABLE SIZES: 7,5”
HANDLES: Offset
TEFLON RIDE: Double Teflon Ride

RECOMMENDED LEVEL: Expert
RECOMMENDED USE: Scissors designed for working on straight, woolly, and thick coats, they are also ideal for double coats. They have strong, sturdy teeth with 4 grooves each, which offer a uniform cut thanks to the reduced space between the teeth. The width of the teeth and the V-shape of the grooves allow large quantities of thick coat to be cut effortlessly, retaining a considerable amount of coat inside, making these scissors the ideal tool for commercial and quick grooming.

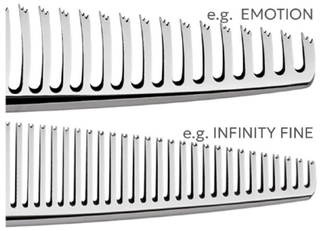
01.4 BLENDER SCISSORS

Blender scissors consist of a plain blade and a toothed blade. They are characterized by a fine tooth, which has one or more grooves (slots) on its tip. They are used for finishing and to create a natural effect on smooth coats.

BLENDERS for STRAIGHT COATS

2ND PHASE
FINISHING AND NATURAL EFFECT

Blade with NARROW TOOTH WITH SLOTS



EMOTION 30T

SKU: F4301 **SIZE:** 6,5”

TYPE OF SCISSORS: Blenders
MATERIAL: Japanese Steel SUS440C
BLADE TYPE: Convex + Blenders
CUTTING RATIO: 45%
TEETH: 30
SCREW: Ball Bearing
HARDNESS: 60-61 HRC
AVAILABLE SIZES: 6,5”
HANDLES: Semi Offset
TEFLON RIDE: Double Teflon Ride

RECOMMENDED LEVEL: Beginner, Intermediate, Expert
RECOMMENDED USE: Scissors that allow you to work on all difficult coats, very sparse, silky or drooping hair, without leaving any marks. Thanks to their slotted teeth, they don’t let any hair escape. Ideal for shaping and finishing the head, with a very natural, foolproof effect. Super light and easy to handle.

INFINITY 30T - 37T

SKU: F4101 **SIZE:** 6,5”
SKU: F4102 **SIZE:** 7,5”

TYPE OF SCISSORS: Blenders
MATERIAL: Japanese Steel SUS440C
BLADE TYPE: Convex + Blenders
CUTTING RATIO: 50%
TEETH: 30 in the size 6,5”
TEETH: 37 in the size: 7,5”
SCREW: Ball Bearing
HARDNESS: 60-61 HRC
AVAILABLE SIZES: 6,5” - 7,5”
HANDLES: Semi Offset
TEFLON RIDE: Double Teflon Ride

RECOMMENDED LEVEL: Beginner, Intermediate, Expert
RECOMMENDED USE: Scissors that give a natural effect even with large amounts of coat. Ideal for smooth, long, and woolly coats. The unique handle design and very short thumb “branches” allow for a wide blade opening and fast work. Suitable for layering on the trunk of dogs with difficult coats. Powerful performance guaranteed.

INFINITY FINE 46T - 57T

SKU: F4201 **SIZE:** 6,5”
SKU: F4202 **SIZE:** 7,5”

TYPE OF SCISSORS: Blenders
MATERIAL: Japanese Steel SUS440C
BLADE TYPE: Convex + Blenders
CUTTING RATIO: 50%
TEETH: 46 in the size 6,5”
TEETH: 57 in the size 7,5”
SCREW: Ball Bearing
HARDNESS: 60-61 HRC
AVAILABLE SIZES: 6,5” - 7,5”
HANDLES: Semi Offset
TEFLON RIDE: Double Teflon Ride

RECOMMENDED LEVEL: Beginner, Intermediate, Expert
RECOMMENDED USE: Scissors that give a natural effect on all smooth, straight, long, and silky coats. They will never leave any trace of their passage or any teeth marks. Ideal for giving a natural look to all commercial dogs; excellent for Spaniels and suitable for all types of finishing. Among the most used scissors in the collection. Essential and unique!

ACADEMY BLENDERS 46T

SKU: F9401 **SIZE:** 7”

TYPE OF SCISSORS: Blenders
MATERIAL: Cobalt Steel
BLADE TYPE: Convex + Chunkers
CUTTING RATIO: 50%
TEETH: 46
SCREW: Ball Bearing
HARDNESS: 57-58 HRC
AVAILABLE SIZES: 7”
HANDLES: Semi Offset
TEFLON RIDE: None

RECOMMENDED LEVEL: Beginner
RECOMMENDED USE: Finishing scissors designed for novice groomers. They create a natural effect on all straight, long, and silky coats. Perfect for groomers who require a clean finish. These scissors are lightweight and easy to handle; the cutting action is smooth and comfortable. Excellent value for money.

FUEGO 50T

SKU: F4701 **SIZE:** 7”

TYPE OF SCISSORS: Blenders
MATERIAL: Japanese Steel SUS440C
BLADE TYPE: Convex + Blenders
CUTTING RATIO: 55%
TEETH: 50
SCREW: Ball Bearing
HARDNESS: 60-61 HRC
AVAILABLE SIZES: 7”
HANDLES: Offset
TEFLON RIDE: Double Teflon Ride

RECOMMENDED LEVEL: Intermediate, Expert
RECOMMENDED USE: Latest generation scissors representing the most recent evolution in finishing tools. Equipped with a wider blade, they allow large areas of coat to be cut in just a few snips, leaving no trace of their passage. Ideal for fine, sparse, and thin coats, they are perfect for all finishing touches on soft coats that require a velvety effect. They offer a smooth and powerful cut, always guaranteeing impeccable results.

LIBERTY 50T BLENDERS

SKU: F4801 **SIZE:** 7”

TYPE OF SCISSORS: Blenders
MATERIAL: Cobalt Steel
BLADE TYPE: Convex + Blenders
CUTTING RATIO: 55%
TEETH: 50
SCREW: Ball Bearing
HARDNESS: 57-58 HRC
AVAILABLE SIZES: 7”
HANDLES: Offset
TEFLON RIDE: None

RECOMMENDED LEVEL: Beginner
RECOMMENDED USE: Scissors for everyday commercial use, these are sturdy Blenders that give a natural result even on the thickest and most difficult coats, while being more economical than other scissors in the Akko Scissors range (which are technically and qualitatively superior). Ideal for smooth coats, they are also excellent for dogs with undercoat, such as Spitz or Spaniels, and for all finishing work on hard coats.

SILKY FEELING 66T

SKU: F4401 **SIZE:** 7,5”

TYPE OF SCISSORS: Blenders
MATERIAL: Japanese Steel SUS440C
BLADE TYPE: Convex + Blenders
CUTTING RATIO: 60%
TEETH: 66
SCREW: Ball Bearing
HARDNESS: 60-61 HRC
AVAILABLE SIZES: 7,5”
HANDLES: Semi Offset
TEFLON RIDE: Double Teflon Ride

RECOMMENDED LEVEL: Beginner, Intermediate, Expert
RECOMMENDED USE: Finishing scissors for smooth coats, giving an extremely natural effect; excellent for blending layers. The semi-convex blades cut effortlessly and blend different coat lengths without leaving any cutting lines or marks. Also ideal for working on muzzles and for creating natural layered cuts, ensuring a smudge-free finish.

DOLOMITI 35T

SKU: F4601 **SIZE:** 7”

TYPE OF SCISSORS: Blenders
MATERIAL: Cobalt Steel
BLADE TYPE: Convex + Blenders
CUTTING RATIO: 65%
TEETH: 35
SCREW: Ball Bearing
HARDNESS: 58-59 HRC
AVAILABLE SIZES: 7”
HANDLES: Semi Offset
TEFLON RIDE: Double Teflon Ride

RECOMMENDED LEVEL: Intermediate, Expert
RECOMMENDED USE: Extraordinary scissors for working on smooth, dense coats, but also excellent for double coats, such as spaniels, or wire coats, thanks to the special teeth with two slots, which always guarantee a natural result. They are effective on both large amounts of coat and softer coats; perfect for daily finishing in commercial work, but also for precision details in grooming competitions.

GALAXY 30T

SKU: F4501 **SIZE:** 7,5”

TYPE OF SCISSORS: Blenders
MATERIAL: Japanese Steel SUS440C
BLADE TYPE: Convex + Blenders
CUTTING RATIO: 70%
TEETH: 30
SCREW: Ball Bearing
HARDNESS: 60-61 HRC
AVAILABLE SIZES: 7,5”
HANDLES: Semi Offset
TEFLON RIDE: Double Teflon Ride

RECOMMENDED LEVEL: Intermediate, Expert
RECOMMENDED USE: Scissors that always ensure high cutting quality. They feature a special, slightly hollowed tooth that holds the hair inside, preventing it from slipping out during cutting. They can also handle thick coats. They guarantee excellent finishing, especially on smooth and double coats. Also ideal for cutting and finishing heads or for smoothing the coat after clipping with a clipper with attachment combs.

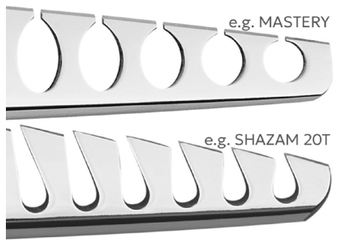
01.5 CHUNKER SCISSORS

Chunker scissors consist of a plain blade and a toothed blade. They are characterized by a wide, usually T-shaped tooth; the tip of the tooth is flat and without slots. If they have fewer than 25 teeth, they can be used to create lines on curly coats; if they have more than 25 teeth, they are also suitable for pre-finishing, again on curly coats.

CHUNKERS for CURLY COATS

1ST PHASE
ROUGHING QUANTITY

Blade with WIDE and FLAT TOOTH



MODUS 18T

SKU: F5201 **SIZE:** 7,5”

TYPE OF SCISSORS: Chunkers
MATERIAL: Cobalt Steel
BLADE TYPE: Convex + Chunkers with double-toothed blades
CUTTING RATIO: 75%
TEETH: 18
SCREW: Ball Bearing
HARDNESS: 58-59 HRC
AVAILABLE SIZES: 7,5”
HANDLES: Semi Offset
TEFLON RIDE: Double Teflon Ride

RECOMMENDED LEVEL: Expert
RECOMMENDED USE: Very strong scissors, suitable for curly coats. Thanks to the characteristic “T” shape of the teeth, they gather the hair in the cutting closure without letting even a single hair escape! With a double serrated blade, they allow for very fast and sculpted work. The special coating on the handles protects against nickel allergies. Top quality at the best price!

SHAZAM 18T - 20T

SKU: F5301 **SIZE:** 7”
SKU: F5302 **SIZE:** 7,5”

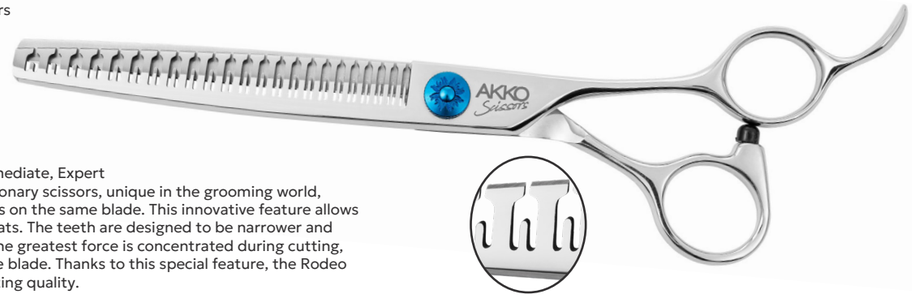
TYPE OF SCISSORS: Chunkers
MATERIAL: Japanese Steel SUS440C
BLADE TYPE: Convex + Chunkers
CUTTING RATIO: 80%
TEETH: 18 in the size 7”
TEETH: 20 in the size 7,5”
SCREW: Ball Bearing
HARDNESS: 60-61 HRC
AVAILABLE SIZES: 7” - 7,5”
HANDLES: Semi Offset
TEFLON RIDE: Double Teflon Ride

RECOMMENDED LEVEL: Beginner, Intermediate, Expert
RECOMMENDED USE: Perfect scissors for all curly, semi-long, double, semi-hard, and silky coats. Therefore, they are very versatile tools! Valuable for creating angles and curves. Very strong scissors, yet surprisingly comfortable and well-balanced. The special material covering the handles protects against nickel allergies. Superb scissors!

RODEO 23T

SKU: F5401 **SIZE:** 7”

TYPE OF SCISSORS: Chunkers
MATERIAL: Japanese Steel SUS440C
BLADE TYPE: Convex + Chunkers
CUTTING RATIO: 80%
TEETH: 23
SCREW: Ball Bearing
HARDNESS: 60-61 HRC
AVAILABLE SIZES: 7”
HANDLES: Offset
TEFLON RIDE: None



RECOMMENDED LEVEL: Intermediate, Expert
RECOMMENDED USE: Revolutionary scissors, unique in the grooming world, featuring teeth of different sizes on the same blade. This innovative feature allows for great precision in cutting coats. The teeth are designed to be narrower and smaller near the screw, where the greatest force is concentrated during cutting, and wider towards the tip of the blade. Thanks to this special feature, the Rodeo 23T offers truly impeccable cutting quality.

LIBERTY 18T CHUNKERS

SKU: F5501 **SIZE:** 7”

TYPE OF SCISSORS: Chunkers
MATERIAL: Cobalt Steel
BLADE TYPE: Convex + Chunkers
CUTTING RATIO: 80%
TEETH: 18
SCREW: Ball Bearing
HARDNESS: 57-58 HRC
AVAILABLE SIZES: 7”
HANDLES: Offset
TEFLON RIDE: None

RECOMMENDED LEVEL: Beginner,
RECOMMENDED USE: Strong and sturdy scissors that are surprisingly comfortable to use, yet more economical than other scissors in the Akko Scissors range (which are technically and qualitatively superior). Suitable for everyday commercial work, they are excellent for all semi-long, double, semi-hard, long, and silky coats. In addition, the powerful teeth cut all curly hair cleanly and with little effort, even the least abundant and softest. By holding the scissors at different angles, the percentage of coat removed can be changed.

ACADEMY CHUNKERS 18T

SKU: F9501 **SIZE:** 7”

TYPE OF SCISSORS: Chunkers
MATERIAL: Cobalt Steel
BLADE TYPE: Convex + Chunkers
CUTTING RATIO: 80%
TEETH: 18
SCREW: Ball Bearing
HARDNESS: 57-58 HRC
AVAILABLE SIZES: 7”
HANDLES: Semi Offset
TEFLON RIDE: None

RECOMMENDED LEVEL: Beginner
RECOMMENDED USE: Scissors with T-shaped teeth, which allow you to create lines, angles and curves on all types of coat, mainly curly but also double coats. The cutting action is smooth. Excellent value for money.

MASTERY 16T

SKU: F5101 **SIZE:** 7,5”

TYPE OF SCISSORS: Chunkers
MATERIAL: Japanese Steel SUS440C
BLADE TYPE: Convex + Chunkers
CUTTING RATIO: 90%
TEETH: 16
SCREW: Ball Bearing
HARDNESS: 60-61 HRC
AVAILABLE SIZES: 7,5”
HANDLES: Offset
TEFLON RIDE: Double Teflon Ride

RECOMMENDED LEVEL: Expert
RECOMMENDED USE: Powerful and fast scissors that cut curly coats effortlessly. They allow you to create lines, angles, and curves on all curly and voluminous coats with just a few snips. They are very versatile for all daily grooming tasks. Precise and balanced scissors, suitable for meeting the high demands of groomers. Chunkers scissors will surprise you!

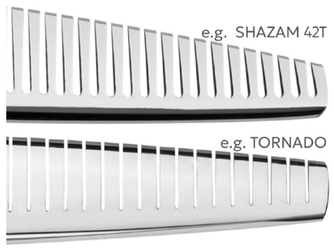
01.6 FLUFFER SCISSORS

Fluffers are the latest scissors, with teeth on only one blade, wider than Blenders but narrower than Chunkers; the space between the teeth is uniform along their entire length, from their base to their tip, and the design is called “piano teeth.” Some Fluffers, such as the Tornado 35T, are reversible and can therefore be used with the teeth facing up or down. Excellent for working quickly on large areas, as the wide blades remove large amounts of coat in a single cut. Perfect for soft coats, giving them a natural finish.

FLUFFERS for CURLY COATS

2ND PHASE
FINISHING WITH CLEAN CUT EFFECT

Blade with NARROW and FLAT TOOTH



A REVOLUTION EXTREME 33T

SKU: F6301 **SIZE:** 7”

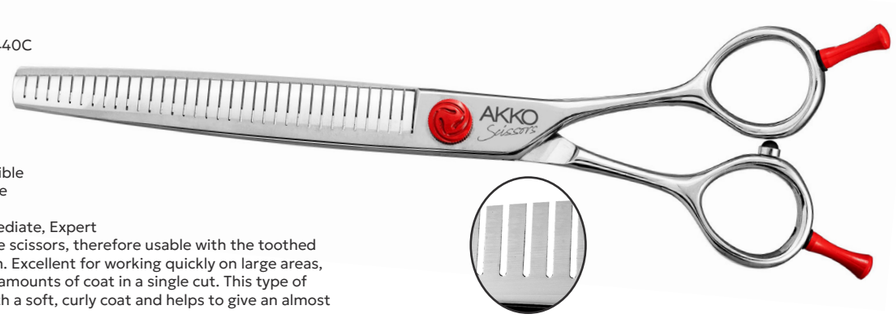
TYPE OF SCISSORS: Fluffers
MATERIAL: Japanese Steel SUS440C
BLADE TYPE: Convex + Fluffers
CUTTING RATIO: 65%
TEETH: 33
SCREW: Ball Bearing
HARDNESS: 60-61 HRC
AVAILABLE SIZES: 7”
HANDLES: Semi Offset
TEFLON RIDE: Double Teflon Ride

RECOMMENDED LEVEL: Intermediate, Expert
RECOMMENDED USE: Scissors with technologically advanced Laser sharpening, giving them exceptional cutting ability. The extremely sharp “hammer” teeth are wide, allowing for very quick cutting that leaves no marks on the coat. These are multifunctional scissors, exceptional for finishing and smoothing curly coats, but also perfect for working on double coats.

TORNADO 35T

SKU: F6201 **SIZE:** 7”

TYPE OF SCISSORS: Fluffers
MATERIAL: Japanese Steel SUS440C
BLADE TYPE: Convex + Fluffers
CUTTING RATIO: 70%
TEETH: 35
SCREW: Ball Bearing
HARDNESS: 60-61 HRC
AVAILABLE SIZES: 7”
HANDLES: Symmetrical - Reversible
TEFLON RIDE: Double Teflon Ride

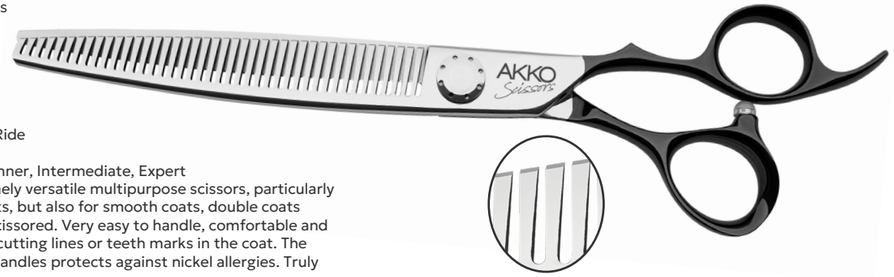


RECOMMENDED LEVEL: Intermediate, Expert
RECOMMENDED USE: Reversible scissors, therefore usable with the toothed blade either at the top or bottom. Excellent for working quickly on large areas, as the wide blades remove large amounts of coat in a single cut. This type of scissors is perfect for all dogs with a soft, curly coat and helps to give an almost natural finish.

SHAZAM 42T

SKU: F6101 **SIZE:** 7,5”

TYPE OF SCISSORS: Fluffers
MATERIAL: Japanese Steel SUS440C
BLADE TYPE: Convex + Fluffers
CUTTING RATIO: 75%
TEETH: 42
SCREW: Ball Bearing
HARDNESS: 60-61 HRC
AVAILABLE SIZES: 7,5”
HANDLES: Semi Offset
TEFLON RIDE: Double Teflon Ride



RECOMMENDED LEVEL: Beginner, Intermediate, Expert
RECOMMENDED USE: Extremely versatile multipurpose scissors, particularly suitable for finishing curly coats, but also for smooth coats, double coats and Terriers that need to be scissored. Very easy to handle, comfortable and ergonomic. They do not leave cutting lines or teeth marks in the coat. The special material covering the handles protects against nickel allergies. Truly sublime scissors!

01.7 THINNER SCISSORS

In toothed or thinning scissors, the teeth are present on both blades. They are mostly used on dogs with thick undercoats, to thin out the coat from the inside.

FLUFFY 27T

SKU: F7101 **SIZE:** 6,5”
SKU: F7102 **SIZE:** 7”

TYPE OF SCISSORS: Double Toothed-Thinners
MATERIAL: Cobalt Steel
BLADE TYPE: Double Teeth
CUTTING RATIO: 55%
TEETH: 27
SCREW: Ball Bearing
HARDNESS: 58-59 HRC
AVAILABLE SIZES: 6,5” - 7”
HANDLES: Semi Offset
TEFLON RIDE: Double Teflon Ride

RECOMMENDED LEVEL: Beginner, Intermediate, Expert
RECOMMENDED USE: Scissors designed to thin excess coat on very voluminous coats, such as those of Newfoundlands, Golden Retrievers, or Spitz, with just a few snips. Each cut removes approximately 50-55% of the coat, leaving a completely natural effect. The Fluffy 27T is also suitable for sculpting and shaping the angles of dogs with straight coats and for working on curly and rather thin coats.

FLUFFY 40T

SKU: F7201 **SIZE:** 6,5”
SKU: F7202 **SIZE:** 7”
SKU: F7203 **SIZE:** 7,5”

TYPE OF SCISSORS: Double Toothed-Thinners
MATERIAL: Japanese Steel SUS440C
BLADE TYPE: Double Teeth
CUTTING RATIO: 65%
TEETH: 40
SCREW: Ball Bearing
HARDNESS: 60-61 HRC
AVAILABLE SIZES: 6,5”- 7”-7,5”
HANDLES: Semi Offset
TEFLON RIDE: Double Teflon Ride

RECOMMENDED LEVEL: Beginner, Intermediate, Expert
RECOMMENDED USE: Ideal scissors for double coats with a thick undercoat, such as Spitz dogs. They are versatile, allowing excellent finishing even on smooth coats. Excellent for removing excess undercoat: in this case, they are used by penetrating the coat and cutting as they come out. They facilitate work on silky textures and are fantastic on very thin curly coats. Very light scissors.

DUPLEX 23T

SKU: F7301 **SIZE:** 7”

TYPE OF SCISSORS: Double Toothed-Thinners
MATERIAL: Cobalt Steel
BLADE TYPE: Double Teeth
CUTTING RATIO: 70%
TEETH: 23
SCREW: Ball Bearing
HARDNESS: 58-59 HRC
AVAILABLE SIZES: 7”
HANDLES: Semi Offset
TEFLON RIDE: Double Teflon Ride

RECOMMENDED LEVEL: Intermediate, Expert
RECOMMENDED USE: Versatile scissors with serrated blades on both sides, designed to achieve precise lines with few snips and to thin out excess undercoat. They are suitable for all breeds with double coats and are particularly effective on straight, silky, and hanging coats and on featherings. Despite the teeth on both blades, the coat flows smoothly between them, ensuring flawless gliding and quick work.

01.8 SUPER BLENDER/ BLENDER/ CHUNKER/ FLUFFER CURVED SCISSORS

Curved scissors, such as Super Blender, Blender, Chunker, and Fluffer Curved, are essential tools for shaping and finishing the coat. The curvature of the blade allows for smooth rounding, even in the most difficult areas.
More and more groomers are using curved scissors with teeth because they offer a margin of safety during work: they easily correct mistakes and speed up the process. Wider teeth shorten quickly without reducing volume, while finer teeth create texture and natural movement. Thanks to these features, curved scissors with teeth are perfect for both commercial work and grooming competitions.

MAMMA MIA! 39T - 15° NEW

SKU: F2410 **SIZE:** 7,5”

TYPE OF SCISSORS: Curved Blenders
MATERIAL: Japanese SUS440C steel
BLADE TYPE: Convex + Blenders
CUTTING RATIO: 50%
TEETH: 39
SCREW: Ball bearing
CURVATURE: 15°
HARDNESS: 60-61 HRC
AVAILABLE SIZES: 7.5”
HANDLES: Symmetrical – Reversible
TEFLON RIDE: None

RECOMMENDED LEVEL: Intermediate, Expert
RECOMMENDED USE: MAMMAMIA! 39T - 15° Curved Blenders offer a bold cut with an extremely natural finish. Their 15° curvature follows anatomical lines on smooth, silky, straight, and fine coats. A wide blade and solid handles ensure powerful, precise cutting, even on thick and textured coats. Symmetrical, reversible handles allow easy use in both directions. Each tooth's three-slot design thins evenly. For clean, knot-free coats only, perfect for many flowing-coat breeds.

RAPTOR 28T - 15° NEW

SKU: F2403 **SIZE:** 7”

TYPE OF SCISSORS: Curved Blenders/Super Blenders
MATERIAL: Japanese Steel SUS440C
BLADE TYPE: Convex + Blenders/Super Blenders
CUTTING RATIO: 55%
TEETH: 28
SCREW: Ball Bearing
CURVATURE: 15°
HARDNESS: 60-61 HRC
AVAILABLE SIZES: 7”
HANDLES: Symmetrical - Reversible
TEFLON CHANNEL: None

RECOMMENDED LEVEL: Beginner, Intermediate, Expert
RECOMMENDED USE: Ideal for thinning dense areas and layering coats, these scissors remove excess volume and add texture for a flawless cut. Their ability to produce a blended, natural effect makes them perfect for all coat types, leaving a balanced, uniform and completely finished look. The 15° blade angle is designed to tackle the rounded areas of the dog's body, such as the hocks, rib-cage, and head, ensuring good control on all rounded areas, regardless of the size of the dog.

TORNADO 42T - 15°

SKU: F2610 **SIZE:** 7”

TYPE OF SCISSORS: Curved Fluffers
MATERIAL: Japanese Steel SUS440C
BLADE TYPE: Convex + Fluffers
CUTTING RATIO: 70%
TEETH: 42
SCREW: Ball Bearing
CURVATURE: 15°
HARDNESS: 60-61 HRC
AVAILABLE SIZES: 7”
HANDLES: Symmetrical - Reversible
TEFLON RIDE: None

RECOMMENDED LEVEL: Intermediate, Expert
RECOMMENDED USE: Scissors that, with their special piano-shaped teeth and 15° curvature, cut, finish, and create roundness at the same time. This type of scissors is perfect for all dogs with a soft, curly coat, giving them an almost natural finish. Fantastic for correcting details with extreme care.

RAPTOR 28T - 15°
Curved Blenders/Super Blenders

TUXEDO 39T - 15° NEW

SKU: F2409 **SIZE:** 7,5”

TYPE OF SCISSORS: Curved Blenders/Super Blenders
MATERIAL: Japanese SUS440C steel
BLADE TYPE: Convex + Blenders/Super Blenders
CUTTING RATIO: 75%
TEETH: 39
SCREW: Ball bearing
CURVATURE: 15°
HARDNESS: 60-61 HRC
AVAILABLE SIZES: 7.5”
HANDLES: Symmetrical – Reversible
TEFLON CHANNEL: None

RECOMMENDED LEVEL: Expert
RECOMMENDED USE: TUXEDO 39T - 15° Curved Thinning shears are professional Super Blenders for smooth, straight, woolly, or double coats. The wide blade and symmetrical, balanced handles ensure high cutting power and controlled coat removal with no lines. Alternating wide/narrow teeth with deep slots deliver uniform thinning and clean transitions. The 15° curved blade follows anatomical contours, enhancing speed, precision, and fluidity on dense or textured coats. Perfect for salon work and competitions.

MAXIMA 24T - 15°

SKU: F2301 **SIZE:** 7,5”

TYPE OF SCISSORS: Curved Super Blenders
MATERIAL: Japanese Steel SUS440C
BLADE TYPE: Convex + Super Blenders
CUTTING RATIO: 90%
TEETH: 24
SCREW: Ball Bearing
CURVATURE: 15°
HARDNESS: 60-61 HRC
AVAILABLE SIZES: 7,5”
HANDLES: Symmetrical - Reversible
TEFLON CHANNEL: None

RECOMMENDED LEVEL: Expert
RECOMMENDED USE: Ideal scissors for working on straight, woolly and thick coats, including double coats, perfectly executing large curves. Thanks to the sturdy teeth with 4 grooves and the reduced space between them, they guarantee a uniform and precise cut. The wide teeth and V-shaped grooves allow large amounts of coat to be removed effortlessly, making them perfect for fast commercial grooming and dogs with thick coats, such as Newfoundlands and Bernese Mountain Dogs. At the same time, they also give a natural effect on curly coats such as those of Poodles.

ALL INCLUSIVE 29T - 20°

SKU: F2508 **SIZE:** 7”

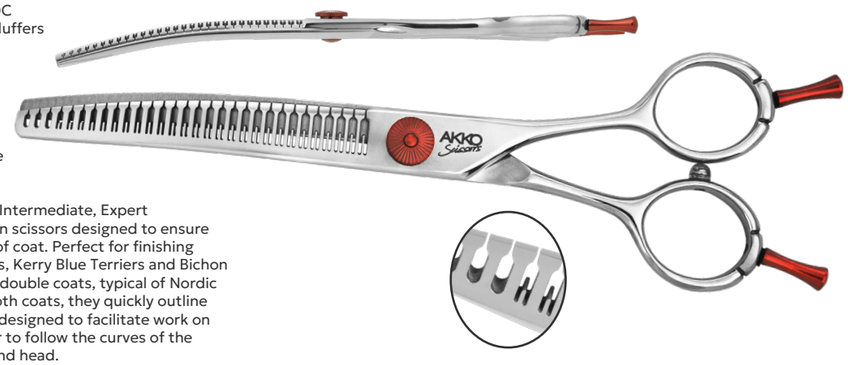
TYPE OF SCISSORS: Curved Chunkers
MATERIAL: Japanese Steel SUS440C
BLADE TYPE: Convex + Chunkers
CUTTING RATIO: 70%
TEETH: 29
SCREW: Ball Bearing
CURVATURE: 20°
HARDNESS: 60-61 HRC
AVAILABLE SIZES: 7”
HANDLES: Symmetrical - Reversible
TEFLON RIDE: None

RECOMMENDED LEVEL: Intermediate, Expert
RECOMMENDED USE: Scissors that offer extraordinary cutting capacity and speed, thanks to the advanced use of Laser for sharpening the teeth.
With a 20° angle, they can quickly cut all the curves of the body, such as the rib-cage, buttocks, hocks, and head, regardless of the size of the animal. Designed to create lines on curly coats, they are also ideal for working on smooth coats, creating a clean cut line that can then be perfected with Blender scissors for a more natural effect. Their versatility makes them suitable for all types of coat, offering different results depending on the use.

FREEMONT 30T - 20° NEW

SKU: F2561 **SIZE:** 7”

TYPE OF SCISSORS: Curved Chunkers/Fluffers
MATERIAL: Japanese Steel SUS440C
BLADE TYPE: Convex + Chunkers/Fluffers
CUTTING RATIO: 75%
TEETH: 30
SCREW: Ball Bearing
CURVATURE: 20°
HARDNESS: 60-61 HRC
AVAILABLE SIZES: 7”
HANDLES: Symmetrical - Reversible
TEFLON CHANNEL: None



RECOMMENDED LEVEL: Beginner, Intermediate, Expert
RECOMMENDED USE: Multifunction scissors designed to ensure quick and precise cuts on any type of coat. Perfect for finishing curly coats, such as those of Poodles, Kerry Blue Terriers and Bichon Frisés, they are equally effective on double coats, typical of Nordic breeds or Newfoundlands. On smooth coats, they quickly outline the desired shape. The 20° curve is designed to facilitate work on any cutting surface, making it easier to follow the curves of the body, such as the hocks, rib-cage, and head.

AVENGER 42T - 20° NEW

SKU: F2612 **SIZE:** 7”

TYPE OF SCISSORS: Curved Fluffers
MATERIAL: Japanese Steel SUS440C
BLADE TYPE: Convex + Fluffers
CUTTING RATIO: 75%
TEETH: 42
SCREW: Ball Bearing
CURVATURE: 20°
HARDNESS: 60-61 HRC
AVAILABLE SIZES: 7”
HANDLES: Symmetrical - Reversible
TEFLON CHANNEL: None

RECOMMENDED LEVEL: Beginner, Intermediate, Expert
RECOMMENDED USE: Scissors designed to offer quick and even cuts on any type of coat. Thanks to the combination of alternating wide and narrow teeth, they reduce the volume of the coat evenly, without leaving visible marks. The 20° curve allows them to easily adapt to the different angles of the dog’s body, ensuring natural and precise thinning on all breeds. Their high durability makes them an indispensable tool for professional groomers who seek precision, comfort, and consistent performance.

I AM PHENOMENAL 66T - 25° CURVED BLENDERS

SKU: F2405 **SIZE:** 7,25”

TYPE OF SCISSORS: Curved Blenders
MATERIAL: Japanese Steel SUS440C
BLADE TYPE: Convex + Blenders
CUTTING RATIO: 50%
TEETH: 66
SCREW: Ball Bearing
CURVATURE: 25°
HARDNESS: 60-61 HRC
AVAILABLE SIZES: 7,25”
HANDLES: Symmetrical - Reversible
TEFLON RIDE: None

RECOMMENDED LEVEL: Beginner, Intermediate, Expert
RECOMMENDED USE: Scissors for finishing all soft, fluffy and thin coats. Thanks to their 25° degree curvature, they create perfect curves; the numerous, closely spaced teeth allow a velvet effect to be achieved. Among the most widely used scissors for both commercial work and competition cutting. Recommended for use on clean coats; not suitable for use on thick coats. The special coating on the handles protects against nickel allergies. Scissors suitable for expert hands.

I AM PHENOMENAL 50T - 25° CURVED BLENDERS

SKU: F2404 **SIZE:** 7,25”

TYPE OF SCISSORS: Curved Blenders
MATERIAL: Japanese Steel SUS440C
BLADE TYPE: Convex + Blenders
CUTTING RATIO: 55%
TEETH: 50
SCREW: Ball Bearing
CURVATURE: 25°
HARDNESS: 60-61 HRC
AVAILABLE SIZES: 7.25”
HANDLES: Symmetrical - Reversible
TEFLON RIDE: None

RECOMMENDED LEVEL: Beginner, Intermediate, Expert
RECOMMENDED USE: Scissors specially designed to finish soft, fluffy coats, creating perfect curves thanks to their 25° curvature. The numerous closely spaced teeth allow you to achieve a velvety effect, leaving no trace of their passage and ensuring a natural finish. These scissors are also extremely versatile and easy to handle thanks to the symmetry of the handles, making them widely used in both commercial and competitive grooming. We recommend using them on clean coats that are not too thick. The handles are coated with a special material to protect against nickel allergies.

I AM PHENOMENAL 34T - 25° CURVED CHUNKERS

SKU: F2507 **SIZE:** 7,25”

TYPE OF SCISSORS: Curved Chunkers
MATERIAL: Japanese Steel SUS440C
BLADE TYPE: Convex + Chunkers
CUTTING RATIO: 75%
TEETH: 34
SCREW: Ball Bearing
CURVATURE: 25°
HARDNESS: 60-61 HRC
AVAILABLE SIZES: 7,25”
HANDLES: Symmetrical - Reversible
TEFLON RIDE: None

RECOMMENDED LEVEL: Beginner, Intermediate, Expert
RECOMMENDED USE: Scissors that allow you to create lines on curly coats, but also on smooth and woolly coats, achieving a good finish. At the same time, their 25° curve creates perfect roundness. They are indispensable for everyday grooming work. The special material covering the handles protects against nickel allergies.

I AM PHENOMENAL 24T - 25° CURVED CHUNKERS

SKU: F2506 **SIZE:** 7,25”

TYPE OF SCISSORS: Curved Chunkers
MATERIAL: Japanese Steel SUS440C
BLADE TYPE: Convex + Chunkers
CUTTING RATIO: 80%
TEETH: 24
SCREW: Ball Bearing
CURVATURE: 25°
HARDNESS: 60-61 HRC
AVAILABLE SIZES: 7,25”
HANDLES: Symmetrical - Reversible
TEFLON RIDE: None

RECOMMENDED LEVEL: Intermediate, expert.
RECOMMENDED USE: T-shaped-wide-toothed scissors that allow for quick cutting while shaping perfect curves. Thanks to the curved blades, they speed up the execution of all angles. They can be used on both curly and straight coats, as well as on soft and fluffy textures. Among the most widely used scissors for both commercial work and grooming competitions. The special material covering the handles protects against nickel allergies.

BRAVO 27T - 25° NEW

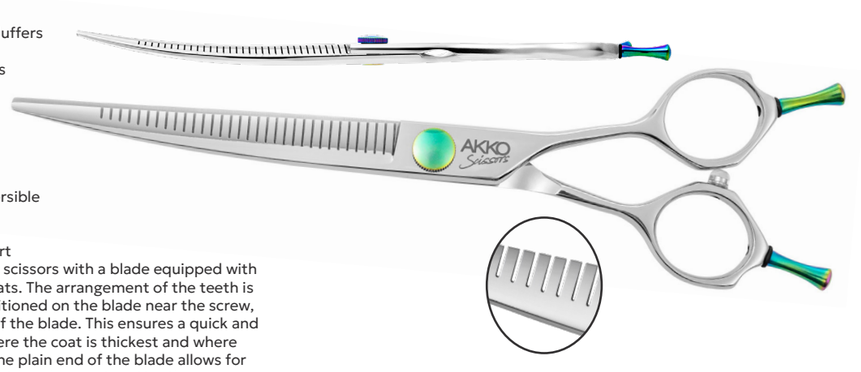
SKU: F2509 **SIZE:** 7,5”

TYPE OF SCISSORS: Curved Chunkers
MATERIAL: Japanese Steel SUS440C
BLADE TYPE: Convex + Chunkers
CUTTING RATIO: 85%
TEETH: 27
SCREW: Ball Bearing
CURVATURE: 25°
HARDNESS: 60-61 HRC
AVAILABLE SIZES: 7.5”
HANDLES: Symmetrical - Reversible
TEFLON CHANNEL: None

RECOMMENDED LEVEL: Intermediate, Expert
RECOMMENDED USE: Scissors offering exceptional control on all types of coat. They are ideal for creating a defined effect on smooth coats, while on curly coats, such as those of Poodles and Bichons, they guarantee a flawless, natural finish. Double coats, such as those of Spitz dogs, can also be worked on with great effectiveness. The 25° curve allows you to easily shape the curves of the dog’s body: they are perfect for working on the rib-cage, hocks, hindquarters, and head.

DISCOVERY 32T - 30°

SKU: F2611 **SIZE:** 7”



TYPE OF SCISSORS: Curved Fluffers
MATERIAL: Cobalt Steel
BLADE TYPE: Convex + Fluffers
CUTTING RATIO: 75%
TEETH: 32
SCREW: Ball Bearing
CURVATURE: 30°
HARDNESS: 58-59 HRC
AVAILABLE SIZES: 7”
HANDLES: Symmetrical - Reversible
TEFLON RIDE: None

RECOMMENDED LEVEL: Expert
RECOMMENDED USE: Unique scissors with a blade equipped with Fluffer teeth, ideal for curly coats. The arrangement of the teeth is highly innovative: they are positioned on the blade near the screw, tapering off towards the end of the blade. This ensures a quick and natural cut near the screw, where the coat is thickest and where the cutting force is greatest. The plain end of the blade allows for high precision work in areas that require greater attention.

FORCE ONE 18T - 30°

SKU: F2302 **SIZE:** 7”

TYPE OF SCISSORS: Curved Super Blenders
MATERIAL: Japanese Steel SUS440C
BLADE TYPE: Convex + Blenders
CUTTING RATIO: 90%
TEETH: 18
SCREW: Ball Bearing
CURVATURE: 30°
HARDNESS: 60-61 HRC
AVAILABLE SIZES: 7”
HANDLES: Symmetrical - Reversible
TEFLON CHANNEL: None

RECOMMENDED LEVEL: Expert
RECOMMENDED USE: Scissors that, thanks to advanced CNC laser sharpening, have a truly unique cutting capacity! Its 18 teeth are equipped with special “tiger tooth” slots that cut through large amounts of both thick and voluminous coats, as well as smooth, silky, and double coats. The reversible symmetrical handles and the specially designed 30° curvature of the blades allow you to work easily on all curves and any type of coat: also excellent on coarse and rough coats!

01.9 SCISSORS FOR LEFT-HANDED GROOMERS

Our line of scissors for left-handed users, though limited, includes one model for each category. Each scissor is designed to ensure ergonomics and comfort, perfectly adapting to the left hand. Ideal for professional groomers, they offer precision, reliability, performance, and comfort in everyday work.

SKU: F8101 **SIZE:** 8”

BELIEVE LEFTY

TYPE OF SCISSORS: Straight for Left-handed Groomers
MATERIAL: Japanese Steel SUS440C
BLADE TYPE: Convex – Wide Blade
CUTTING RATIO: 100%
SCREW: Ball Bearing
HARDNESS: 60-61 HRC
AVAILABLE SIZES: 8”
HANDLES: Offset
TEFLON RIDE: Double Teflon Ride

RECOMMENDED LEVEL: Intermediate, Expert
RECOMMENDED USE: Powerful scissors, capable of cutting any coat thickness and texture. Ideal for creating lines and quickly roughing out curly, smooth or double coats. Also excellent for finishing. Excellent for precision work. The offset handles offer maximum comfort and allow the scissors to be used for long working sessions. Believe, scissors for true connoisseurs.

SKU: F8201 **SIZE:** 8”

MAGIC BALL 30° LEFTY

TYPE OF SCISSORS: Curved for Left-handed Groomers
MATERIAL: Japanese Steel SUS440C
BLADE TYPE: Convex – Intermediate Blade
CUTTING RATIO: 100%
SCREW: Ball Bearing
CURVATURE: 30°
HARDNESS: 60-61 HRC
AVAILABLE SIZES: 8”
HANDLES: Semi Offset
TEFLON RIDE: None

RECOMMENDED LEVEL: Intermediate, Expert
RECOMMENDED USE: Powerful scissors that cut through any amount of coat. Ideal for creating lines and quickly roughing out, both on curly and smooth coats. Designed to shape the roundness of the rib-cage and large heads on medium and large dogs, they are also excellent finishing scissors.

SKU: F8401 **SIZE:** 6,5”

INFINITY 46T LEFTY

TYPE OF SCISSORS: Blenders for Left-handed Groomers
MATERIAL: Japanese Steel SUS440C
BLADE TYPE: Convex + Blenders
CUTTING RATIO: 50%
TEETH: 46
SCREW: Ball Bearing
HARDNESS: 60-61 HRC
AVAILABLE SIZES: 6,5”
HANDLES: Semi Offset
TEFLON RIDE: Double Teflon Ride

RECOMMENDED LEVEL: Intermediate, Expert
RECOMMENDED USE: They provide a natural look for all smooth, straight, long and silky coats. They don’t leave any traces or marks. Ideal for achieving natural effects on all heads in professional cuts. Excellent for Spaniels and suitable for all types of trimming. One of the most widely used scissors in the collection. Essential and unique!

SKU: F8501 **SIZE:** 7,5”

SHAZAM 20T LEFTY

TYPE OF SCISSORS: Chunkers for Left-handed Groomers
MATERIAL: Japanese Steel SUS440C
BLADE TYPE: Convex + Chunkers
CUTTING RATIO: 80%
TEETH: 20
SCREW: Ball Bearing
HARDNESS: 58-59 HRC
AVAILABLE SIZES: 7,5”
HANDLES: 60-61 HRC
TEFLON RIDE: Double Teflon Ride

RECOMMENDED LEVEL: Beginner, Intermediate, Expert
RECOMMENDED USE: Perfect scissors for all curly, semi-long, double, semi-hard, and silky coats. Therefore, they are very versatile tools! Valuable for creating angles and curves. Very strong scissors, yet surprisingly comfortable and well-balanced. The special material covering the handles protects against nickel allergies. Superb scissors!

SKU: F8601 **SIZE:** 7,5”

SHAZAM 42T LEFTY

TYPE OF SCISSORS: Fluffers for Left-handed Groomers
MATERIAL: Cobalt steel
BLADE TYPE: Convex + Fluffers
CUTTING RATIO: 75%
TEETH: 42
SCREW: Ball Bearing
HARDNESS: 58-59 HRC
AVAILABLE SIZES: 7,5’”
HANDLES: 60-61 HRC
TEFLON RIDE: Double Teflon Ride

RECOMMENDED LEVEL: Beginner, Intermediate, Expert
RECOMMENDED USE: Extremely versatile multipurpose scissors, particularly suitable for finishing curly coats, but also for smooth coats, double coats and Terriers that need to be trimmed with scissors. Very easy to handle, comfortable and ergonomic. They do not leave cutting lines or teeth marks in the coat. The special material covering the handles protects against nickel allergies. Truly sublime scissors!

SKU: F8602 **SIZE:** 7”

TORNADO 42T - 15° LEFTY

TYPE OF SCISSORS: Curved Fluffers for Left-handed Groomers
MATERIAL: Japanese Steel SUS440C
BLADE TYPE: Convex + Fluffers
CUTTING RATIO: 70%
TEETH: 42
SCREW: Ball Bearing
CURVATURE: 15°
HARDNESS: 60-61 HRC
AVAILABLE SIZES: 7”
HANDLES: Symmetrical - Reversible
TEFLON RIDE: None

RECOMMENDED LEVEL: Intermediate, Expert
RECOMMENDED USE: Symmetrical and reversible curved scissors which, with their special piano teeth and 15° curvature, cut, finish and create roundness at the same time. This type of scissors is perfect for all dogs with soft, curly coats and helps to give an almost natural finish. Fantastic for correcting details with extreme care.

SKU: F8402 **SIZE:** 7”

LEGGENDA 24T LEFTY

TYPE OF SCISSORS: Super Blenders for Left-handed Groomers
MATERIAL: Cobalt Steel
BLADE TYPE: Convex + Super Blenders
CUTTING RATIO: 75%
TEETH: 24
SCREW: Ball Bearing
HARDNESS: 58-59 HRC
AVAILABLE SIZES: 7”
HANDLES: 60-61 HRC
TEFLON RIDE: Double Teflon Ride

RECOMMENDED LEVEL: Beginner, Intermediate, Expert
RECOMMENDED USE: Extraordinary scissors for working on large amounts of smooth, straight, and silky coats at high speed. They have a cutting percentage that allows you to create the line without leaving obvious marks, thus allowing a good finish that does not require subsequent reworking with other types of scissors. They are also excellent for use on curly, brittle, and thin coats.

SCISSORS SETS FOR STUDENTS

For every stage of learning, we offer two complete sets for students, designed based on experience: both include straight, curved, blender, and chunker scissors. The Academy Set is ideal for beginners, designed to reduce errors and improve control, while the Liberty Set is perfect for those with a few months of experience who want to increase speed without compromising precision. Both sets offer excellent value for money, supporting each student in their professional growth journey.

Academy and Liberty scissors can be purchased individually, already presented earlier in the catalogue, or as a complete set of four, offering an economical and reliable solution for students and beginner groomers.

ACADEMY SCISSORS SET

Academy scissors are designed for the very first days of grooming training and represent the ideal first scissors for complete beginners, perfect for gaining confidence with basic techniques during the learning phase. The complete set includes:

ACADEMY STRAIGHT

ACADEMY CURVED 25°

ACADEMY BLENDERS 46T

ACADEMY CHUNKERS 18T

SKU: F9100 **COMPOSITION:** 4 Scissors

LIBERTY SCISSORS SET

Although designed for students, Liberty scissors are robust, well balanced, and surprisingly comfortable. They offer an excellent price-to-quality ratio and ensure reliable performance on a variety of coat types, making them ideal for the everyday commercial work of those at the beginning of their grooming career. The complete set includes:

LIBERTY STRAIGHT

LIBERTY CURVED 30°

LIBERTY BLENDERS 50T

LIBERTY CHUNKERS 18T

SKU: F9200 **COMPOSITION:** 4 Scissors

01.11
HOW TO TAKE CARE OF SCISSORS

CLEANING THE SCISSORS

Regular cleaning helps keep the blades sharp for longer. The blades should be cleaned after each cut and oiled frequently. We recommend using a soft cloth for daily cleaning of the scissors. When the blades of the scissors are covered with hair, moisture, and chemicals, corrosion can occur (yes, even stainless steel can corrode!). Sprays, conditioners in general, lacquers, antistatic agents, or hair contaminated with these substances leave a chemical film on the blades, which can dull them and compromise the quality of the cut.

LUBRICATION OF SCISSOR BLADES

The blades of the scissors must be oiled at the end of each day. A light film of oil on the edge of the blades protects the scissors, helping to keep moisture away and keeping the blades smoother when moving. Only use oil specifically designed for lubricating scissors!
The oil stick dispenser is provided free of charge and allows for optimal lubrication. Apply a drop of oil to the pivot/screw area and brush along the inner edge of each blade.

ADJUSTING THE SCISSORS

After lubricating the scissors, adjust them if the blades are too tight or too loose (we recommend checking them daily). As a general rule, the scissors are correctly adjusted when, holding them with the blades closed in a horizontal position with your thumb pointing downwards, you remove your thumb from the ring and the scissors remain closed. With the slightest movement of your hand, the blade controlled by your thumb opens. Conversely, if the blades do not open, it means that the screw is too tight and needs to be loosened just enough to achieve the result described above. Be careful not to tighten or loosen the screw too much, as this could damage the sharpness of the scissors during use. Adjustment with the Ball Bearing screw is much safer, because with one click, the system automatically helps to prevent mistakes.

02

SCISSORS' ACCESSORIES

A curated selection of accessories designed to protect, maintain, and organise your grooming tools. Practical, durable, and essential for keeping your equipment in perfect working order

SCISSORS CASE, FABRIC ROLL FOR 12 PCS "AKKO EMILY"

SKU: E1021

NAIL CLIPPER “AKKO RONNY”

Stainless steel nail clipper. With a non-slip ergonomic handle and sharp blade tips, they are able to give a clean and safe nail cut. Accidental openings can be avoided thanks to their safety lock making it easy to work in total safety during its use. The smaller version, available in black, is designed for medium to small dogs and cats. The larger version, available in red or blue, is designed for medium to large dogs.
SIZE: Large 16.5×9 cm opening

SKU: N1010 **SIZE:** Large
SKU: N1011 **SIZE:** Small

04
STRIPPERS

A wide range of stripping tools designed to remove coat efficiently while preserving its natural texture. Versatile on every coat type and ergonomically crafted to suit every hand, they offer excellent control and comfort during use

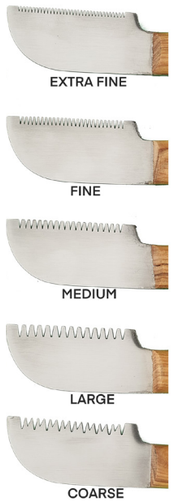
04.1 STRIPPING KNIVES

The stripping knife is an essential tool for every groomer, designed to remove dead hair without damaging the coat. The choice of model and blade type is personal, and having different types allows working on all coat types, including coarse and wire coat.

STRIPPING KNIVES “AKKO JADE”

AKKO JADE stripping knives are made to the highest quality standards and are ideal for working on all types of wire and hard coats. Designed with lightweight stainless steel blades, they do not damage or break the coat. They can be used on show dogs and for commercial use in grooming salons. The blade is made of stainless steel. The high-quality wooden handle has an anti-rotation system.

AKKO JADE stripping knives are available in five blade types: Extra Fine, Fine, Medium, Large, and Coarse featuring alternating teeth. They are also available for left-handed users. Each blade can be purchased individually, or as a complete set of all five types, designed to meet every need of the professional groomer.



JADE Extra Fine blade: suitable for defining work already done or for particular short areas such as the ears, or for finishing the head, masseterlc area, lower throat, or in cases of particularly sensitive skin. This knife is also excellent for maintenance trimming. 32 extra-fine teeth.

JADE Fine blade: ideal for working on areas that require greater definition, such as shoulders, chest, outer ear, etc. The type of tooth prevents injury to the dog’s skin. Excellent for trimming or blending different coat lengths. 26 fine teeth.

JADE Medium blade: the most popular and widely used blade in grooming salons due to its versatility. It allows you to strip all short and medium areas, such as the back and croup, with different coat densities. Excellent for commercial work in grooming salons. 18 medium teeth.

JADE Large blade: excellent for working on unkempt coats or for thinning out large amounts of coat without damaging the coat or hurting the dog’s skin. This blade is also suitable for thick, long coats with a heavy undercoat. 13 wide teeth.

JADE Coarse or alternating teeth blade: the alternating teeth are used to achieve a more refined trimming of the dog’s coat and to perform 50% hand-stripping, removing only the longest coat and leaving the shorter undercoat. 16 alternating long and short teeth.

MATERIAL: Stainless steel blades, fine Kou Tree wood handle.

STRIPPING KNIVES “AKKO SASHA”

AKKO SASHA stripping knives feature precision stainless steel blades preserve coat texture, ideal for all wire and hard coats. The ergonomic wood handle offers a secure, anti-rotation grip. AKKO SASHA are available in four blade types: Extra Fine, Fine, Medium, and Large. They are also available for left-handed users. Each blade can be purchased individually, or as a complete set of all four types, designed to meet every need of the professional groomer.

SASHA Extra Fine blade: this type of blade is used to define the work done previously: thanks to its teeth, it can perfectly sculpt the areas that have been worked on or those that you want to highlight. It is also widely used for specific areas such as the ears (especially the inside and edges), for finishing the head, masseteric area, lower throat, head in general, or for particularly sensitive skin. It is also used for trimming the dog’s coat, i.e. for maintenance work. 32 extra-fine teeth.

SASHA Fine blade: this blade has narrow teeth, which allow you to work on areas that need more finishing, such as shoulders, chest, outer ear, etc. This type of tooth avoids injuring the dog’s skin. It is ideal for trimming or blending different coat lengths. 26 fine teeth.

SASHA Medium blade: this blade is the most widely used in grooming salons because it is the most versatile blade, allowing you to work on different areas of the body, even with thicker coats. Excellent knife for stripping all short and medium areas or for the back and croup, and for commercial work in grooming salons. 18 medium teeth.

SASHA Large blade: This blade is used for dogs with unkempt coats, for thinning out large amounts of hair without damaging the coat or hurting the dog’s skin. It is very popular with beginners who have not yet mastered the Hand-Stripping technique. This blade is also perfect for thick, long coats with abundant undercoat or for difficult dogs. The space between the teeth is wide. 13 wide teeth.

AKKO SWEETY
Stripping Knives

SET OF 2 STRIPPING STICKS “AKKO SWEETY”

Set of 2 Stripping Sticks – Fine and Medium
This duo is designed for precise, gentle removal of undercoat and woolly hair, ideal for Spaniels and similar breeds. It preserves the coat’s natural texture and is also great for refining wire coats. Sweety Sticks are perfect for groomers seeking a natural finish, especially those less experienced with traditional knives. Lightweight and ergonomic with a “Comfy” grip, they reduce hand fatigue during extended use.

MATERIAL: Metal alloy with rubber handle
SIZES:
Small 12×1 cm
Large 14×1.7 cm

SKU: B1002

04.2 PUMICE TOOLS

Natural pumice tools designed for controlled coat work and gentle hair removal. Lightweight, ergonomic, and versatile, they support a wide range of grooming techniques with precision and ease

NATURAL STONE BLACK STICK “AKKO GRAYSTONE”

Pumice stone designed for stripping woolly or soft coats, ideal for Spaniels and similar breeds. Its stick shape offers a better grip and precise removal of undercoat without damaging the topcoat. Also suitable for finishing wire coats, it gently removes woolly hair while preserving coat texture. Made of natural stone with a “Comfy” ergonomic grip, it’s lightweight, easy to use, and reduces hand fatigue. Suitable for both right- and left-handed groomers.

DIMENSIONS: 13×1,8 cm
MATERIAL: Natural pumice stone

SKU: F1010

NATURAL STONE RED STICK DOUBLE-SIDED “AKKO MELLOW”

AKKO MELLOW is a double-sided pumice stone designed for stripping woolly and soft coats, ideal for Spaniels and similar breeds. Its ergonomic stick shape offers a secure grip and precise control. Made of natural stone with a “Comfy” coating, it gently removes the undercoat without damaging the topcoat. Lightweight, easy to handle, and suitable for both right- and left-handed users. One end is wider for larger areas; the other is narrower for detailed work.

MATERIAL: Natural pumice stone
DIMENSIONS: 13×2 cm

SKU: F1051

NATURAL STONE BLUE STICK DOUBLE-SIDED “AKKO CABOCHON” LARGE

AKKO CABOCHON LARGE is a natural double-sided pumice stone, ideal for stripping soft and woolly coats like those of Spaniels. Its ergonomic stick shape ensures control and comfort. It gently removes the undercoat without damaging the topcoat, and is also great for finishing wire coats. Lightweight, with a “Comfy” grip, it’s perfect for both right- and left-handed use. One side is straight for large areas, the other one is shaped for detailed control.

MATERIAL: Natural pumice stone
DIMENSIONS: 13×1.8 cm

SKU: F1043

NATURAL STONE GREEN STICK DOUBLE-SIDED “AKKO CABOCHON” MEDIUM

AKKO CABOCHON MEDIUM is a natural, double-sided pumice stone designed for stripping soft, woolly coats like Spaniels. Its ergonomic stick shape offers a comfortable grip and precise hair removal without damage. Lightweight and balanced, it reduces hand fatigue and suits both right- and left-handed groomers. One side is straight for large areas; the other one is shaped for better control and grip.

MATERIAL: Natural pumice stone
DIMENSIONS: 13×1.4 cm

SKU: F1032

NATURAL STONE PINK STICK DOUBLE-SIDED “AKKO CABOCHON” FINE

AKKO CABOCHON FINE is a natural, double-sided pumice stone designed for soft, woolly coats like Spaniels. Its ergonomic stick shape offers a comfortable grip and precise hair removal without damage. Lightweight and balanced, it reduces hand fatigue and fits both right- and left-handed groomers. One side is straight for large areas; the other one is shaped for better control and grip.

MATERIAL: Natural pumice stone
DIMENSIONS: 13×1 cm

SKU: F1021

PUMICE STONE KNIFE “AKKO DAKOTA”

This stripping tool ensures precise, safe removal of undercoat and woolly hair without damaging the coat. Its wooden handle and flat pumice stone offer comfort and control for both large areas and fine details. Suitable for right- and left-handed users.

MATERIAL: Pumice stone with wooden handle
DIMENSIONS:
Length: 14.5 cm
Pumice: 4.5×2 cm

SKU: K1021

PUMICE COATED KNIFE “AKKO SIERRA”

This stripping knife safely removes undercoat and woolly hair without damaging the topcoat or skin. Its ergonomic, non-slip blue silicone handle offers comfort and control for both large areas and fine details. Suitable for right- and left-handed users.

MATERIAL: Light metal alloy blade coated with pumice stone. Silicone handle.
DIMENSIONS:
Length: 14.5 Cm
Pumice: 3.5×2.5 Cm

SKU: K1011

PUMICE STONES AKKO STRIPPERS

Akko Strippers Pumice Stones are specially selected for hand-stripping, ideal for removing undercoat and secondary woolly hair typical of Spaniels and similar breeds. They are made only with hard-grained material to minimize crumbling and residue.
The stones differ in porosity, shape, and color, adapting to different coat types and grooming stages.

GRAY PUMICE STONE “AKKO SANTOS”:

fairly small, regular-shaped stone, not very porous.

SKU: G1031

BROWN PUMICE STONE “AKKO DAYTONA”:

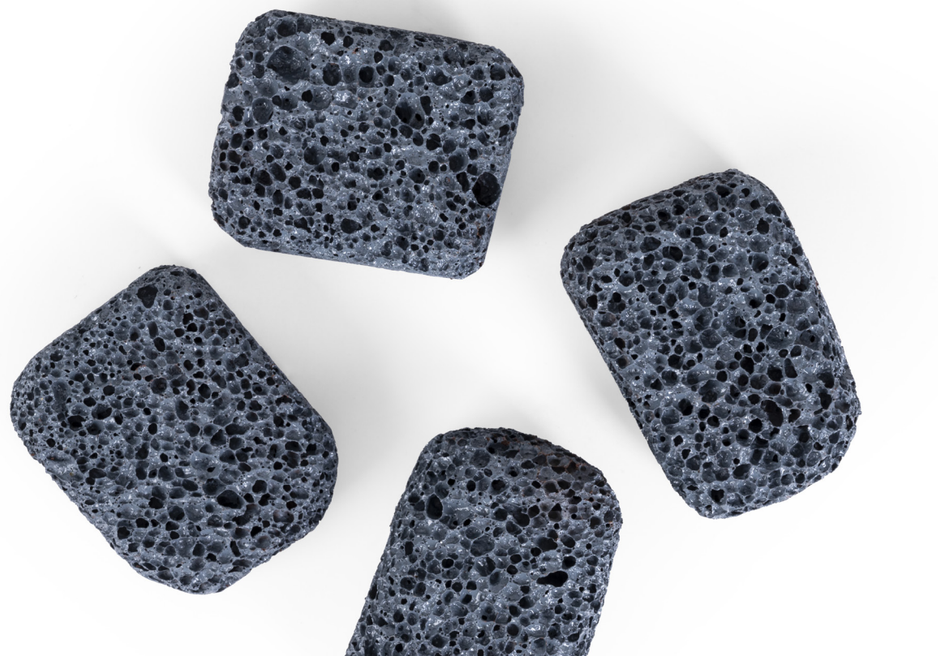
voluminous stone, irregular in shape, fairly porous.

SKU: G1021

BLACK PUMICE STONE “AKKO NAUTILUS”:

small stone with a regular shape and slightly porous texture.

SKU: G1011



04.3 CARDING KNIVES

The carding knives remove undercoat without damaging the hair. Ideal for Spaniels, double-coated breeds, and Hand-Stripping.

SET OF 2 CARDING KNIVES "AKKO LYNN"

Set of 2 carding knives, consisting of two sizes of blades: Fine and Medium. Akko carding knives, also known as "palettes", do not damage or break the coat. They are used to thin the dog's coat, removing excess fluff or undercoat. They should be used close to the skin. Excellent for Spaniels, to make the coat lie flat. Also ideal for dogs with a hard coat at the end of a Hand-Stripping session and for thinning the undercoat on double-coated breeds. They can also remove dead coat on short-haired breeds. The blades are made of hardened stainless steel and the handle is made of fine wood.
CARDING FINE: 37 extra-fine teeth for Carding moderate amounts of coat.
CARDING MEDIUM: 29 medium teeth for Carding large amounts of coat.

MATERIAL: Stainless steel blades, fine Kou Tree wood handle.
DIMENSIONS: 16.5×2.5 cm
BLADE DIMENSIONS: 3.5×7.5 cm

SKU: L1011

04.4 DESHEDDING TOOLS

"AKKO TOP-KING" DESHEDDING TOOLS

The deshedding tool is a rake-shaped instrument with a handle. It is used to facilitate the work of the professional during pre- and post-hand-stripping, or on dogs in the shedding season, to remove dead coat without cutting the healthy coat. The stainless steel teeth work without pulling or damaging the dog's skin.

MATERIAL: Stainless steel blades, fine wood handle.

For use on thick, soft coats and for finishing.

SKU: D1031

05
COMBS

High-quality grooming combs crafted for professional use on any coat type. Lightweight, durable, and designed to deliver accurate, consistent results

AKKO COMBS combs are designed to work best on all types of dog and cat coats. The conical shape of the teeth, with a diameter of 1-3 mm, allows them to grip the coat better at the base and extend it, for a perfect finish. The tips of the comb teeth are not sharp, and the rounded, smooth ends prevent scratching the animal's skin. For greater durability, the handle is electroplated and the galvanic base material is a mix of aluminum, cast iron, steel, and ABS plastic. The teeth are made of stainless steel.

COMB 20 CM – 49T "AKKO OSLO"

MATERIAL: Steel teeth and aluminum handle
TOOTH LENGTH: 3.5 cm
TOOTH WIDTH: 1.58 mm
DISTANCE BETWEEN 2 TEETH: 4 mm
COMB LENGTH: 20 cm
With wider spacing between the teeth, it is mainly used during the cutting phases.

SKU: P1011 **LENGTH:** 20 cm

COMB 25 CM – 62T "AKKO BOSTON"

MATERIAL: Steel teeth and aluminum handle
TOOTH LENGTH: 3.5 cm
TOOTH WIDTH: 1.58 mm
DISTANCE BETWEEN 2 TEETH: 4 mm
COMB LENGTH: 25 cm
With wider spacing between the teeth, it is mainly used during the cutting phases.

SKU: P1071 **LENGTH:** 25 cm

COMBINED COMB 20 CM – 24/38T "AKKO DUBAI"

MATERIAL: Steel teeth and aluminum handle
TOOTH LENGTH: 3.5 cm
TOOTH WIDTH: 1.58 mm
DISTANCE BETWEEN 2 TEETH: Wide part 4 mm - Narrow part 2 mm
COMB LENGTH: 20 cm
With the narrower spacing between the teeth, it is suitable for checking the coat after carding.

SKU: P2021 **LENGTH:** 20 cm

COMBINED COMB 25 CM – 20/48T "AKKO ROME"

MATERIAL: Steel teeth and aluminum handle
TOOTH LENGTH: 3.5 cm
TOOTH WIDTH: 1.58 mm
DISTANCE BETWEEN 2 TEETH: Wide part 4 mm - Narrow part 2 mm
COMB LENGTH: 25 cm
With the narrower spacing between the teeth, it is suitable for checking the coat after carding.

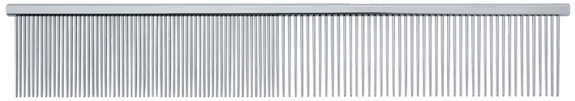
SKU: P2061 **LENGTH:** 25 cm

COMBINED COMB 16,5 CM – 24/45 T "AKKO GATTO"

MATERIAL: Steel teeth and aluminum handle
TOOTH LENGTH: From 1.3 cm to 3.3 cm
DISTANCE BETWEEN 2 TEETH: Wide part 3 mm - Narrow part 1 mm
COMB LENGTH: 16.5 cm
Comb from the Akko Combs line, for cats and Asian-style grooming.

SKU: P2011 **LENGTH:** 16,5 cm

COMBINED FINE-TOOTHED COMB 23 CM - 48/70 T "AKKO COTTON"



MATERIAL: Stainless steel teeth and handle
TOOTH LENGTH: 3.5 cm
TOOTH WIDTH: 1.28 mm
DISTANCE BETWEEN 2 TEETH: Wide part 4 mm - Narrow part 2 mm
COMB LENGTH: 23 cm
Designed for high-quality work and finishing.

SKU: P2041 **LENGTH:** 23 cm

COMBINED COMB WITH CLOSELY SPACED TEETH, 24 CM - 48/20 T "AKKO LAILA"

MATERIAL: Stainless steel teeth and handle
TOOTH LENGTH: 3.5 cm
TOOTH WIDTH: 1.48 mm
DISTANCE BETWEEN 2 TEETH: Wide part 4 mm - Narrow part 2 mm
COMB LENGTH: 24 cm
It penetrates very easily into voluminous and curly coats, such as those of Poodles or Bichons, but is also excellent for the woolier textures of straight-coated breeds.

SKU: P2051 **LENGTH:** 24 cm

COMBINED COMB WITH CLOSELY SPACED TEETH 22 CM - 40/45 T "AKKO JORDANS"

MATERIAL: Stainless steel teeth and handle
LENGTH OF LESS DENSE TEETH: 3 cm
LENGTH OF DENSER TEETH: from 1.1 to 3 cm
TOOTH WIDTH: 1.28 mm
DISTANCE BETWEEN 2 TEETH: Wide part 3 mm - Narrow part 2 mm
COMB LENGTH: 23 cm
Excellent on smooth, silky, and flowing coats, such as those of Yorkshire Terriers and Maltese dogs.

SKU: P2031 **LENGTH:** 23 cm

COMB WITH CLOSELY SPACED TEETH, 22 CM "AKKO RAINBOW"

MATERIAL: Stainless steel teeth and handle
TOOTH LENGTH: 3 cm
TOOTH WIDTH: 1.18 mm
DISTANCE BETWEEN 2 TEETH: 2 mm
COMB LENGTH: 22 cm
Extremely lightweight and easy to handle, for finishing work.

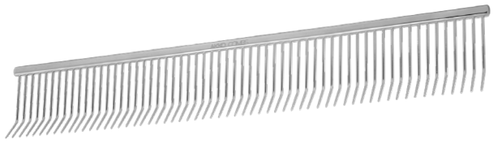
SKU: P1021	**COLOR:** Light blue	**LENGTH:** 22 cm
SKU: P1031	**COLOR:** Black	**LENGTH:** 22 cm
SKU: P1041	**COLOR:** Gold	**LENGTH:** 22 cm
SKU: P1051	**COLOR:** Pink	**LENGTH:** 22 cm
SKU: P1061	**COLOR:** Purple	**LENGTH:** 22 cm

COMBINED CURVED COMB 24 CM – 60/20 T "AKKO SERAFIN"

MATERIAL: Stainless steel teeth and handle, coated with an anti-static finish
TOOTH LENGTH: 3.5 cm
TOOTH WIDTH: 1.58 mm
DISTANCE BETWEEN 2 TEETH: Wide part 5 mm - Narrow part 2.52 mm
COMB LENGTH: 25 cm
The curved handle ensures easy use on rounded areas, while the wide spacing and long teeth make it ideal for long or thick-coated breeds. Perfect for poodles and double-coated dogs. The anti-static coating helps reduce static electricity during grooming.

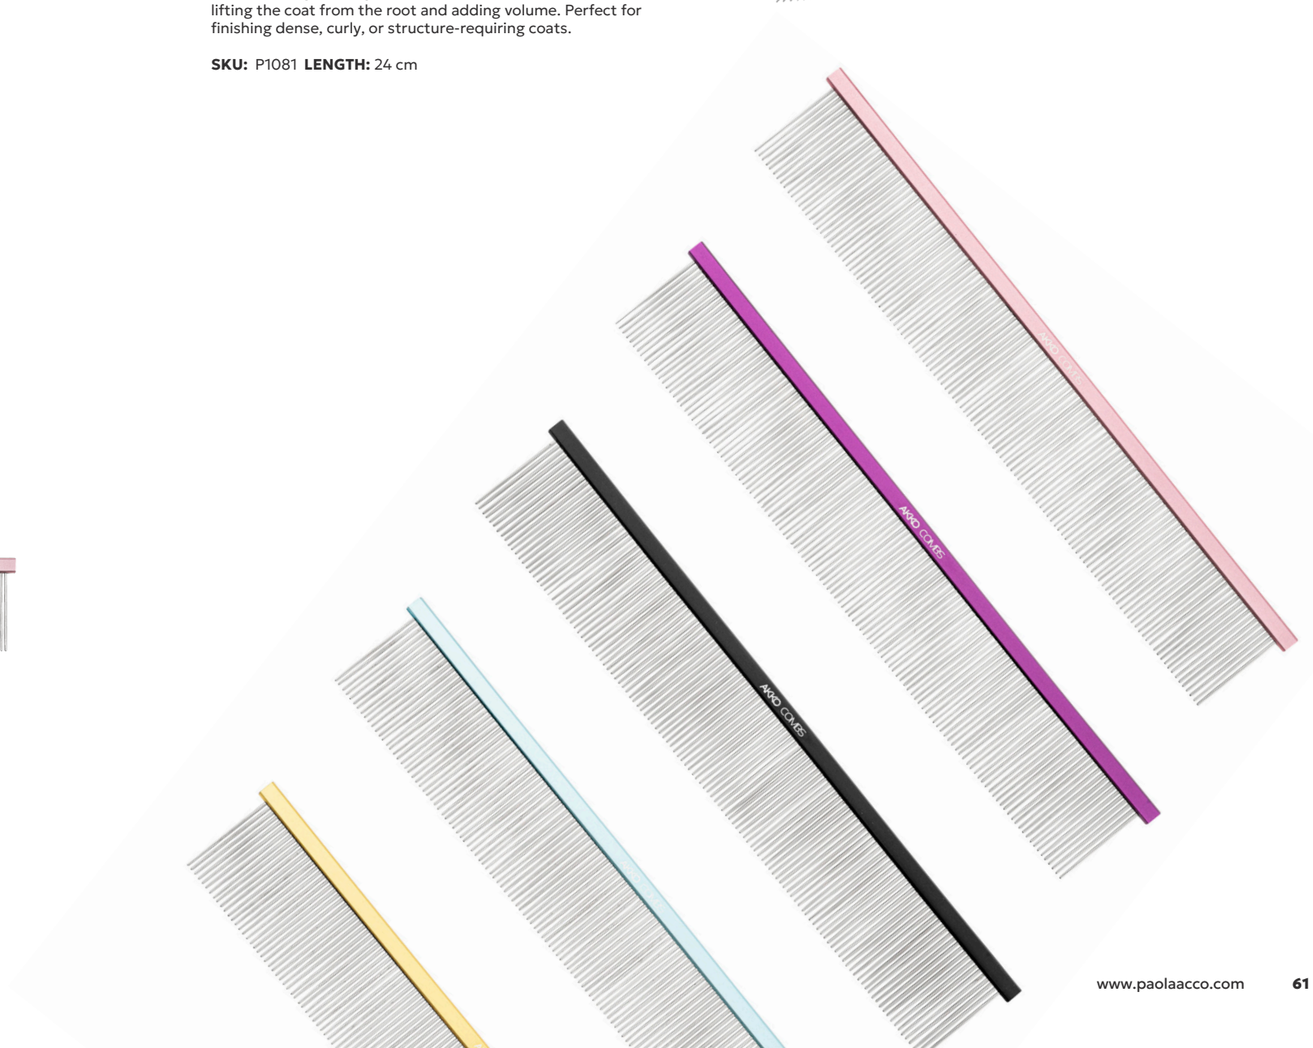
SKU: P2071 **LENGTH:** 25 cm

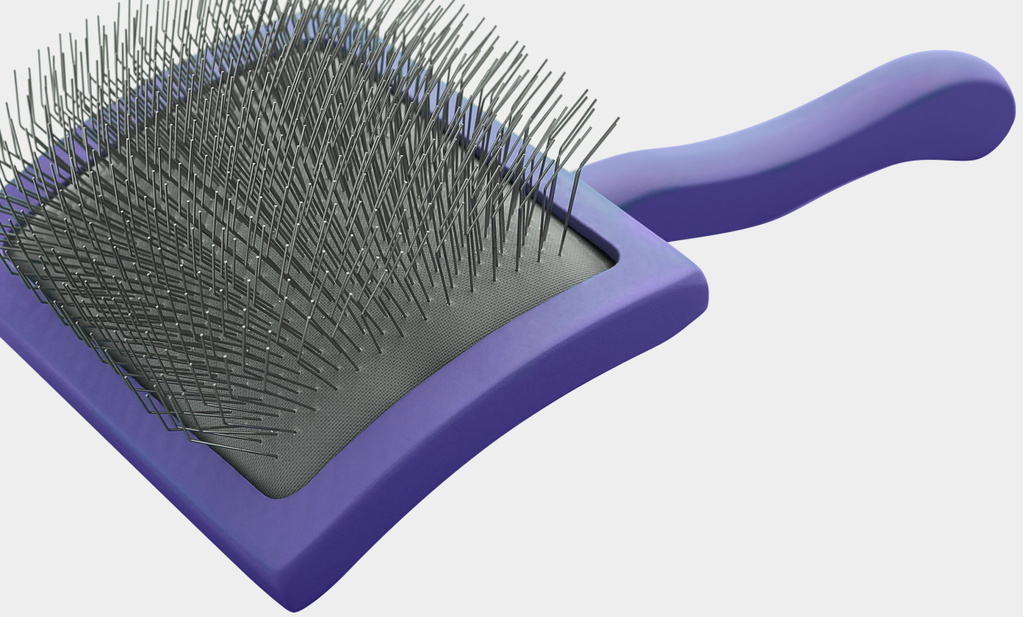
COMB 24 CM - 60T "AKKO CURLYUP"



MATERIAL: Stainless steel teeth and handle
TOOTH LENGTH: 3 cm
TOOTH WIDTH: 1.58 mm
DISTANCE BETWEEN 2 TEETH: 4 mm
COMB LENGTH: 24 cm
Professional grooming comb made of stainless steel, ideal for lifting the coat from the root and adding volume. Perfect for finishing dense, curly, or structure-requiring coats.

SKU: P1081 **LENGTH:** 24 cm





06
SLICKER BRUSHES

High-quality slickers designed to detangle, lift, and prepare the coat with precision, adapting to different textures and grooming techniques

SLICKER “AKKO BRUSH #1”

To be used on dense, intricate mats that are difficult to demat; it has short, sparse, very stiff pins. It is used by tapping on the mat so that the pins hook into it and lift it up. Its purpose is to roughly loosen the most tangled mats, allowing the AKKO BRUSH #2 slicker to be used afterwards.
MATERIAL: Lightweight plastic
DIMENSIONS: Head 8×10 cm - Length 17.5 cm, approx.
PINS LENGTH: 1 cm
PINS THICKNESS: 0.5 mm, approx.

SKU: S3011

SLICKER “AKKO BRUSH #2”

To be used on dense, intricate mats that are difficult to demat; it has short, sparse, very stiff pins. It is used by tapping on the mat so that the pins hook into it and lift it up. Its purpose is to roughly loosen the most tangled mats, allowing the AKKO BRUSH #2 slicker to be used afterwards.
MATERIAL: Lightweight plastic
DIMENSIONS: Head 8×10 cm - Length 17.5 cm, approx.
PINS LENGTH: 1 cm
PINS THICKNESS: 0.5 mm, approx.

SKU: S3022

SLICKER “AKKO HARMONY LARGE”

With its long steel pins, it penetrates deep into the most difficult coats, allowing for effective lifting of the coat. It reaches the base to remove the thickest undercoat, which is otherwise difficult to reach. AKKO HARMONY LARGE is ideal for use on the trunk, spine, and neck.
MATERIAL: Wood covered with non-slip material
PINS: 504
DIMENSIONS: Head 9.5×8.5 cm - Length 20.5 cm, approx.
PINS LENGTH: 2.5 cm
PINS THICKNESS: 0.4 mm, approx.

SKU: S3033

07 CLIPPER BLADES

Precision-engineered A5 clipper blades made from high-quality steel, offering smooth cutting, excellent durability, and long-lasting sharpness

AKKO Scissors

AKKO CLIPPER BLADES (A5 SYSTEM)

The AKKO professional steel clipper blades are compatible with all clippers with an A5 attachment system (Heiniger, Andis, Oster, Moser, Wahl). They always guarantee impeccable grooming results thanks to the excellent quality of the steel, which ensures a long service life and keeps them sharp even after numerous cutting operations. The proven design allows them to glide perfectly through the coat, preventing overheating and ensuring effective grooming. Additionally, the superior manufacturing quality enables the clipper blade to be resharpened multiple times without compromising performance.

SIMPLY THE BEST - BOOK

AKKO Scissors

"Simply the Best" is the most comprehensive professional grooming manual available today, now finally published in English. Written by Paola Acco and Sarah Odette Genova, it offers clear explanations, detailed images, and practical methods applicable to every breed

"SIMPLY THE BEST "- BOOK
ADVANCED GROOMING MANUAL

"Simply the Best" is an international work dedicated to professional grooming, now finally available in English. Written by Paola Acco and Sarah Odette Genova, the manual brings together experience, technique, and method in a clear and structured path for the modern groomer. The work stands out for the precision of its explanations, the accuracy of its procedures, and the extensive presence of photographs and illustrations that guide the reader through every stage of the process: from coat preparation to trimming, stripping, carding, scissoring, and finishing techniques. Each breed is approached with practical and methodical guidance, supported by detailed images and operational instructions applicable both in daily work and in competitive settings. The work is divided into three volumes, which can be purchased individually or as the complete collection. It is available on the official website: www.simplythebestbook.com

Please Note: some images and concepts featured in this Akko Scissors catalog have been taken from "Simply the Best" to ensure technical consistency and clarity.

VOLUME 1 - APPLIED GROOMING THEORY
Fundamental principles of grooming, coat preparation, correct use of tools, and operational methods applicable to all breeds.

VOLUME 2 - POODLE
A volume entirely dedicated to the Poodle: lines, proportions, specific coat preparation, and execution of the main grooming styles of the breed.

VOLUME 3 - THE BREEDS
Practical application of techniques on numerous breeds, with operational guidance and illustrations that support the construction of lines and the management of the different morphologies.

10 KUMARK

THE ITALIAN DRYER STATION FOR PROFESSIONAL GROOMERS

"KUMARK" THE ITALIAN DRYER STATION FOR PROFESSIONAL GROOMERS

Designed and fully manufactured in Italy, KUMARK is the professional dryer created to meet the specific needs of Paola Acco and today's groomers.

Available in two models

KUMARK 1.9 kW

KUMARK RED HOT 2.6 kW

it delivers power, efficiency, and reliability for intensive daily use.

INTELLIGENT CONTROL DISPLAY

– Start/Stop and Power: easily manages device start and shutdown.
– RPM Adjustment: displays the motor speed in real time.
– Current Monitoring: shows instantaneous electrical current consumption.
– Alarm Management: indicates voltage fluctuations or electrical anomalies.
– Motor Protection: automatically stops in case of risk, preventing damage.
- Clear Stop Reason Display: shows the reason for shutdown, facilitating diagnosis and recovery.

WHY CHOOSE IT

Energy savings –25/30%
Three-phase asynchronous motor (1.5 kW or 2.2 kW) with single-phase 230V supply and Inverter technology, which optimizes energy use and reduces consumption compared to standard dryers. Maximum airflow: 300–330 m^3/h.

Energy consumption based on speed	
KUMARK RP 1,5 kW - Power Max 1,9 kW	**KUMARK RED HOT RP 2,2 kW - Power Max 2,6 kW**
1^ speed: 1800 RPM – Power consumption 0.3 kW	1^ speed: 1800 RPM – Power consumption 0.4 kW
2^ speedS: 2400 RPM – Power consumption 0.6 kW	2^ speeds: 2400 RPM – Power consumption 1.0 kW
3^ speedS: 3000 RPM – Power consumption 1.5 kW	3^ speeds: 2600 RPM – Power consumption 1.6 kW
4^ speedS: 3290 RPM – Power consumption 1.9 Kw	4^ speeds: 3050 RPM – Power consumption 2.6 kW

Quiet & powerful
Soundproof coating and carbon-free motor ensure significantly lower noise levels:
– KUMARK 1.5 / 1.9 kW: 70 dB
– KUMARK RED HOT 2.2 / 2.6 kW: 75 dB
Traditional carbon-brush dryers: 95 dB. Less noise means less stress for dogs and a more comfortable workspace.

Industrial-grade components
Both the blower and the inverter are industrial components used in continuous-duty systems in automotive and manufacturing sectors. Designed to run for many hours without overheating or performance loss — in industry, these components operate 24/7 without issues.

Maintenance-free motor
The three-phase asynchronous motor has no carbon brushes, eliminating replacements, preventing breakdowns, and ensuring long-term reliability.

Extendable hose
Flexible hose extends up to 3 meters for easy handling and retracts to 80 cm when off, reducing space.

3-year warranty
Long-lasting performance guaranteed. The motor without carbon brushes ensures durability and consistent output over time — a safe investment for any grooming business.

Stable and safe temperature
Constant air temperature without heating elements:
– KUMARK 1.5 / 1.9 kW: 50–55 °C
– KUMARK RED HOT 2.2 / 2.6 kW: 74–79 °C
No risk of overheating, burns, or excessive heat on the dog's skin.

Low maintenance: one easy-clean filter
A single filter that requires no tools and never needs replacement. First check recommended after 4 months; cleaning takes 10 minutes. If not cleaned, the dryer still works but with reduced performance.

SKU: K1050 **KUMARK 1.9 kW**
SKU: K2200 **KUMARK RED HOT 2.6 kW**

WHY INVERTER TECHNOLOGY MATTERS

– No current peaks at start-up
– Adjustable motor speed and power
– Increased airflow by up to 30% (frequency up to 60 Hz)
– High performance with lower consumption
– Three-phase motor without carbon brushes: long life, low maintenance, maximum reliability

Technical data:
Length: 60 cm – Width: 40 cm – Height: 47 cm – Weight: 35 kg

TEAM AKKO / SIMPLY

COMPETITIVE AND DEMONSTRATION GROOMING TEAM

TEAM AKKO/SIMPLY
COMPETITIVE AND DEMONSTRATION
GROOMING TEAM

Coach
Paola Acco
Program Director & Executive Coordinator

Coach
Sarah Odette Genova
Head Coach & Technical Lead

Sponsored by AKKO Scissors and Simply the Best Book,

the Team Ambassador program brings together a selected group of grooming professionals who follow a comprehensive path of competition and training, focused on technical preparation, professional growth, and continuous support. Each member takes part in a structured and shared journey where skills, collaboration, and common goals drive development both in the ring and in daily work.
The Team is coordinated by Paola Acco, Program Director & Team Coordinator, and led by Head Coach Sarah Odette Genova. Paola oversees the overall structure and balance of the program, while Sarah guides members through technical training, competition preparation, and the development of individual skills.
Members have been chosen not only for their professionalism and passion, but also for their many achievements in grooming competitions, confirming their high technical level. The Team is also distinguished by its human value: more than a group, it is a true professional family built on mutual support and shared growth.
The coaches, and from 2026, the Team Ambassador members as well, actively participate in seminars and training sessions on tools and techniques, offering support to distributors internationally and sharing their expertise, demonstrating versatility and adaptability across all areas of grooming.

Pau Thió Costa
International Export Manager – Distributor Support
Born in Barcelona, where he lives and works.
A professional with over twenty years of experience in the grooming industry, he entered the field in 2003, developing expertise as a commercial consultant and taking part in major trade fairs in Spain, including Iberzoo and Sizoo.
Since 2008, he has focused his work on the development of international markets, managing export projects and collaborations with distributors worldwide. Over the years, he has participated in the most important global pet and grooming exhibitions, such as Interzoo (Germany), Zoomark (Italy), Crufts (United Kingdom), CIPS (China), SuperZoo and Global Pet Expo (USA), as well as prestigious international dog events including the World Dog Show (Paris, Helsinki, Zagreb) and the European Dog Show (Bucharest, Oslo).
His professional background is further enriched by active participation in renowned international grooming competitions, including Artero Slam, Groomania, and Ciseaux d'Or, strengthening his technical expertise and solid reputation within the industry.
Since 2026, he has served as Export Manager for Akko Scissors, Simply The Best, and New Dryer Kumark, also collaborating with the Porrini Group on international market development.

12
AKKO SCISSORS WARRANTY

Akko Scissors provides a warranty on every single pair of scissors purchased, ensuring that each tool is completely free from defects in both manufacturing and materials used. The company exclusively uses high-quality metals and alloys, such as premium Japanese stainless steel or cobalt steel, chosen to deliver professional instruments designed for long-lasting durability and consistently high cutting performance.
The brand has always followed the principles of modern design, paying close attention to ergonomics, hand stability, and precision in cutting, while ensuring optimal functionality for grooming professionals. Before shipment, every pair of scissors undergoes careful inspection, calibration, oiling, and testing directly on real dog hair to verify cutting quality and smooth operation. For this reason, the presence of a few hairs on the blades should not be considered a sign of prior use but rather evidence of the testing performed before packaging.
If any imperfection or anomaly is detected in Akko Scissors products, customers are advised to contact their authorized distributor for proper evaluation by trained technicians.
The warranty period varies depending on the component. Treatments such as titanium coating, screws, finger rests, and steel corrosion resistance are covered for twelve months, while cutting performance, including convex or beveled blades, is covered for six months.
However, the warranty does not cover damages resulting from normal wear due to daily use, accidental drops or impacts, improper placement on hard surfaces, incorrect or non-compliant use, insufficient or missing maintenance, unauthorized sharpening or repairs performed by non-certified technicians, or any modifications not approved by Akko Scissors. The warranty is considered void immediately, even from the second day after purchase, if the scissors show damage caused by drops, accidental impacts, placement with blades open, incorrect thumb pressure during cutting, or improper handling.
Particular care must be taken with delicate tools such as serrated blades, blenders, chunkers, and fluffers. Even minimal contact with a table, especially with slightly open blades, can damage the pivot point and compromise the functionality of the tool. Curved scissors should always be placed on the table with the tips pointing upwards on soft mats to prevent structural deformation.
The warranty is also void if issues arise from over-tightened or overly loose screws, lack of daily blade lubrication, incorrect or self-performed sharpening, natural blade wear from normal use, exposure to chemicals during work or cleaning (including perfumes, spray conditioners, hairsprays, harsh disinfectants, or unsuitable cleaning agents), improper handling of the hand, thumb, or cutting pressure, or failure to follow the company's guidelines. Akko Scissors' authorized technicians are highly qualified and able to identify damage, marks, deformations, or wear caused by improper use.
It is important to understand that a genuine manufacturing defect will appear from the very first use. Akko Scissors' experience demonstrates that it is extremely rare for a product returned after a few days or weeks to exhibit an original defect. In most cases, technicians identify signs of improper use, incorrect placement, inadequate maintenance, incorrect hand or finger handling, improper thumb pressure, or contact with harmful substances. Technicians can accurately assess how long the scissors have been used and identify any tampering or incorrect operational habits, even if the tool has only been used for a few days.
If, during the warranty period and under normal use, damages such as handle deformation or blade breakage occur, Akko Scissors will repair or replace the tool at no additional cost to the customer. Shipping costs remain the responsibility of the purchaser.
All warranty interventions must be performed exclusively at Akko Scissors Authorized Service Centers. Any repair, sharpening, or component replacement carried out elsewhere, including screws, rings, Teflon rides, or rivets, will automatically void the warranty.
Finally, it is important to note that tools sent in after months or even years of use rarely show original defects. In the vast majority of cases, issues are related to normal professional wear, which does not fall under the warranty and requires regular authorized maintenance.
